Manual for: **Jet
ski, Motorcycle, Cargo bike,
Caravan, Car and Outboard
Engine covers**

The cover can be used to cover the Jet Ski, Motorcycle, Cargo Bike, Caravan, Car and Outboard Engine both outside and inside.

The cover is mainly intended to keep the objects clean of dust, leaves, bird droppings, discolouration and rainfall. Although our covers are breathable (permeable to moisture from the inside), we recommend that you only place the cover when the object is as dry as possible.

PLEASE NOTE: the motorcycle and the outboard motor must have cooled down before placing the cover.

- **1.** Fully open the cover.
- **2.** Remove, if possible, the various protruding accessories (mirrors and fold steps, close windows, retract aerials etc.) and cover any sharp edges with a cloth.
- **3.** The zoomed drawstring will hold the cover in place.
- **4.** There is the possibility of additionally securing the Jet Ski cover for trailer transport with the surrounding mounting strips and the supplied strap.

**Storage**

If the cover is not being used, make sure it is dry before placing it back in the bag.

Maintenance

Do not spray the cover with a pressure washer, the cover and the coat layer will be damaged, thereby losing effect.

Take a non-scratching sponge with lukewarm water and dab the cover with it.

Warranty

The guarantee expires if the above is not adhered to. With normal use, a 1-year warranty applies.
