Storage bag

User Manual

Layout

	Function	Instruction
1	LCD Display Screen	Show the battery level and air pressure
2	Power Button	Turn on / off AirKit
3	Preset Pressure “+”	Pressurize
4	Preset Pressure “-”	Decompress
5	Charging Port	Charge the AirKit
6	LED Switch	Turn on / off the LED light
7	Inflate Switch	Start / Stop inflating
8	LED Light	Illumination
9	Air Hose	Connect car tires
10	Car Adapter Cable	Charge the AirKit
11	USB Charge Cable	Charge the AirKit

Specification

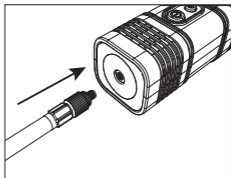

Max Air Pressure	120PSI & 8.25BAR & 8.25kg/cm ²
Battery Capacity	2000mAh, 22.2Wh
DC Input	12V
Operating Voltage	12V
Working Current	≤10A
Rated Power	≤96W
USB Charge Cable Length	1m
Car Adapter Cable Length	3m
Air Hose Length	26cm
Air Pressure Unit	PSI, BAR, kg/cm ²
Inflation Speed	20L/min
Charging time	9 hours or more
Inflation Time	6min (Tire Specification: 185/70R14)
Dimension	56mm*49mm*262mm
Weight	0.62kg
Operating Temperature	0℃-60℃

Operation Guide

How to Inflate Tires

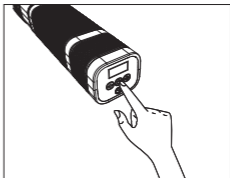

Step 1 :

Connect the air hose to the AirKit.

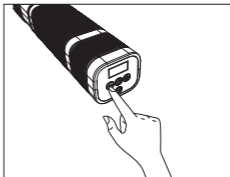

Step 2 :

Press Power Button to turn on the AirKit . The display screen will show the current pressure. You can press the Power Button to switch the pressure unit.

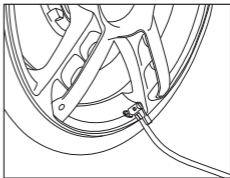

**Step 3 :**

Use the preset pressure "+" and preset pressure "-" to set the desired pressure. Make sure the preset pressure is higher than the current pressure of your tire.

When the air pressure is set, the air pressure numbers will flash 3 times and then display as "0". This means the air pressure preset is successful.

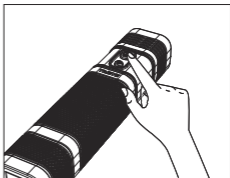

**Step 4 :**

Connect the air hose to your car tire or other inflatable products. Please make sure the connection is firm.

Step 5 :

Press the Inflate Switch to start inflating. It will automatically shut off when it reaches the preset pressure.

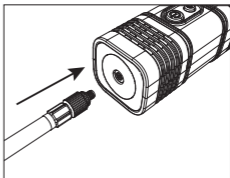

*** When using the car adapter cable to charge the AirKit , you can inflate your tire at the same time.**

*** Operation generates heat, when using AirKit uninterruptedly for 10 minutes, please stop it for at least 15 minutes.**

How to Detect Tire Pressure

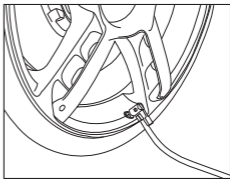

Step 1 :

Connect the air hose to the AirKit.

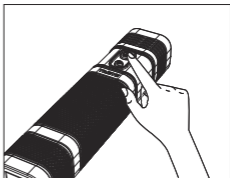

Step 2 :

Connect the air hose to the car tire.

Step 3 :

Press Power Button to turn on the AirKit. The current tire pressure will show on the display screen.

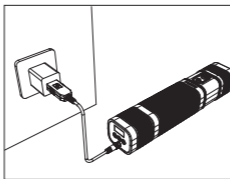

Charging the AirKit

Charging With USB Charge Cable

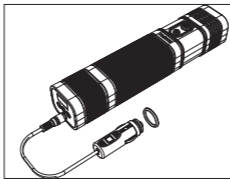

1. Plug the USB charge cable into the wall adaptor or USB charging output.
2. Connect the DC port into the AirKit.

*** Red Light: Charging, Green Light: Fully Charged.**

Charging With Car Adapter Cable

1. Plug the car adaptor into the socket.
2. Connect the DC port into the AirKit.

*** In order to extend the battery life, it's recommended to use the USB charge cable for daily charging. It's recommended to use the car adapter cable only in emergency situations.**

LED Light

Press the LED switch to turn on / off the LED light.

Attention
