BICYCLE VERSION

INNOVV K6 Camera System Intended For Powersports (Motorcycle, E-bike, Bicycle, ATVs & Others) www.innovv.com | www.innovv-powersports.com

App Operation

App Download

iPhone: Please search the INNOVV App in the Apple store or scan the QR code on the right, and install it on your phone. Android: Please search the INNOVV App in Google Play or scan the QR code on the right, and install it on your phone. Please power on the K6, then search the INNOVV Wi-Fi (INNOVV_K6_xxxx) and connect it with the default password 12345678.

1. You may get a message that "Allow "INNOVV" to use your location?" for the first time when you enter the App, please click "Allow while using App". 2. You may get a message "INNOVV Would Like to Access Your Photos" for the first time when you enter the App, please click "Allow Access to All Photos".

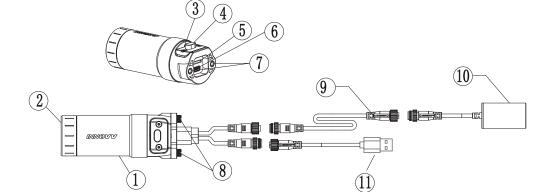

*The green light indicator in the K6 DVR will be solid on after the Wi-Fi is connected.

*Some Android users may get a message that "This WLAN network has no internet access, Connect anyway?", please click "CONNECT" to continue the network connection, or the App will not be able to connect to the DVR.

3. You may get a message that "Please ensure the device is connected" in the network connection, please click "OK", or the App will not be able to connect to the DVR.

Product Overview

Product Features:

2. DVR 3. Internal microphone 4. Button/Indicator TF card input port 6. USB Type-C port 7. Screw-Holes

Front camera

Thumb screws 9. The rear camera extension cable 10. Rear camera

11. USB cable

1. Recording Pausing: Please go to the App and press
to stop the recording. 2. Taking Pictures: Please go to the App and press o to take a picture.

3. Copy the Videos: Take out the TF card from the DVR, or connect the K6 to the PC, you can copy the videos to your computer easily.

4. Factory Default Settings: Restore the default settings by holding the button for more than 10 seconds when the camera is on, release the button when the red light starts to blink

(please notice that the red light will be off for a while before blinking). Blinking red light indicates that the factory default setting is done.

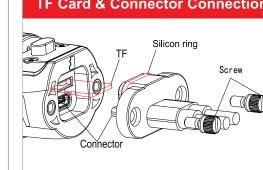

5. Firmware Updating (*Important: the power should not be cut off during the below steps) Step 1: Copy the firmware (K6.bin) to the root of TF card.

*8GB and 32GB TF cards should be formatted into FAT32 in advance.

Step 2: Insert the TF card into the DVR then turn on the camera by holding the button, the red light will flash at low light, release the button and wait for a few seconds till the updating finishes, the K6 will automatically turn on after the update, and the firmware in the card will be automatically deleted as well.

1. You are suggested to select a TF card that fits K6 with a capacity from 8GB to 256GB. The TF card should have a writing speed higher than U3.

2. In order to get better compatibility, please connect INNOVV App in your mobile phone with K6, then format the TF card in the App settings. 3. Please insert the TF card and connect the Type-C connector to the DVR with the guidance of this manual to avoid any DVR or TF card damage.

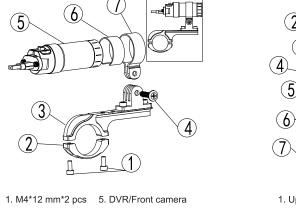

1. Unscrew the screws by a wrench or hand. 2. Hold the DVR and pull out the Type-C connector, insert the TF card into the card slot, please refer to the left picture. 3. Please Confirm the TF card is inserted properly and the silicon ring is placed correctly, then connect the Type-C connector cable back to the DVR and tighten the screws (Please partially and alternately tighten between both screws).

Rear Camera Installation

The INNOVV K6 is designed to be powered by a standard external power supply with a USB port, it requires the power supply with DC 5V±0.5V/2A±0.5A. *Please note that the improper TF card insertion or unsealed silicon ring may *Power bank, USB Power outlet, mobile phone adaptor and other standard 5V USB power supplies cause the malfunction of recording and waterproofness. are recommended, an unqualified one may cause the malfunction such as start-up failure, shut down randomly, or even damage the DVR.

*Please install the camera system by following the guidance below

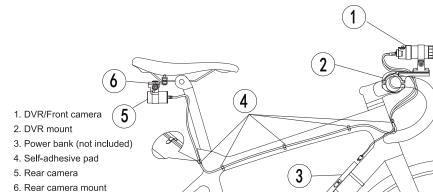

1. Upper bracket slide 6. M6*8 mm*2 pcs 2. Lower bracket 6. 3M rubber cushion 2. M6*12 mm*1 pcs 7. 3M rubber cushion 3. Upper bracket 7. U shape bracket 3. Rubber ring 8. U shape bracket 5. Small block 10. M4*25 mm*3 pcs

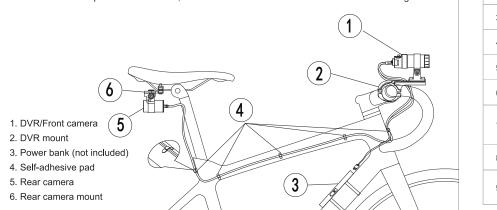

Installation Position and Wiring Arrangement

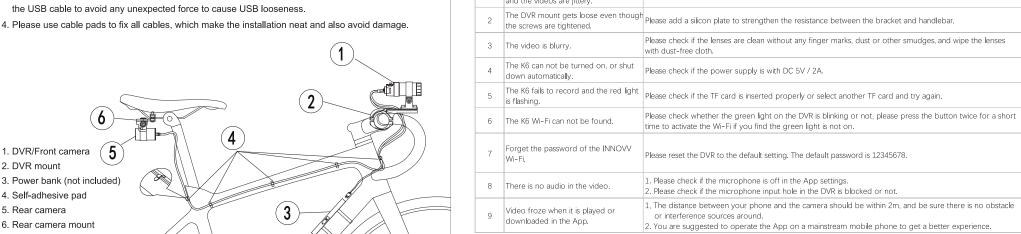

1. To avoid cable breakage, please reserve enough length of cable in the front of the bike.

the USB cable to avoid any unexpected force to cause USB looseness.

2. In order to get a better video angle, please go to the App preview interface while installing the system. 3. The USB connector is a standard one without any locking function, please reserve enough length for

Turn On / Recording -

TF Card Faulty

No	Problems	Solutions				
1	The camera is shaking during riding, and the videos are jittery.	Please check if the camera is parallel to the ground and confirm if the screws are tightened enough.				
2	The DVR mount gets loose even though the screws are tightened.	Please add a silicon plate to strengthen the resistance between the bracket and handlebar.				
3	The video is blurry.	Please check if the lenses are clean without any finger marks, dust or other smudges, and wipe the lenses with dust-free cloth.				
4	The K6 can not be turned on, or shut down automatically.	Please check if the power supply is with DC 5V / 2A.				
5	The K6 fails to record and the red light is flashing.	Please check if the TF card is inserted properly or select another TF card and try again.				
6	The K6 Wi-Fi can not be found.	Please check whether the green light on the DVR is blinking or not, please press the button twice for a short time to activate the Wi-Fi if you find the green light is not on.				
7	Forget the password of the INNOVV Wi-Fi.	Please reset the DVR to the default setting. The default password is 12345678.				
8	There is no audio in the video.	Please check if the microphone is off in the App settings. Please check if the microphone input hole in the DVR is blocked or not.				
		1. The distance between your phone and the general should be within 2m, and be ours there is no obstacle.
