

TRALERT[®]

BETTER LIGHT - WORK SAFER

LED Marker lights

Tralert® your LED specialist

As European importer of exclusive LED vehicle light solutions, Tralert® is distinctive with its complete range of sustainable products, excellent service and professional technical support. Because of our specialization and focus we have grown into one of the largest suppliers in our industry in a short period of time. We represent various reputable manufacturers for the European market.

"It is our mission to make a contribution through the use of LED technology to deliver the safety and visibility of road users"

BETTER LIGHT - WORK SAFER

Extensive range of certified products

With our LED vehicle lighting we focus on both the 12V and the 24V market. Our product range includes:

- LED Work lights
- LED Flashers
- LED Rear lights
- LED Marker lights
- LED Interior lights
- LED Warning lights
- Arrow signs
- Harness systems

For the most up-to-date range, please visit our website: www.tralert.nl

Proven quality

With the Tralert® range you purchase proven quality. The products comply with the applicable standards such as European homologation (E-standards), have an IP56 to IP68 classification, EMC suppression, ECE-R10, ECE-R23 and ECE-R65, EN12352 and EN50293.

Quick delivery

All products are delivered from our logistics centre in Didam (The Netherlands). 95% of all products are available from stock, so that you have the products the next day. We deliver to:

- Truck & trailer part dealers (24V)
- Automotive (12V)
- Manufacturer of mobile roadblocks
- Bodyshops (1st mounting)
- Trailerbuilders
- Intralogistics companies
- Earth-moving manufacturers
- Manufacturers of agricultural machines
- Government

TRALERT®

BETTER LIGHT - WORK SAFER

Tralert® your LED specialist

Distribution support, Technical support

In addition to the professional sales team, we additionally support you with our expert technical department. This creates the possibility to act and develop immediately to customer requests and given suggestions. Many products we produce can be made with customized features on request.

Dealerships

Interested in becoming a dealer of the TRALERT® Portfolio?
Contact TRALERT® to see dealership opportunities.
We are capable to support you actively with sales, tailor-made marketing and product training.

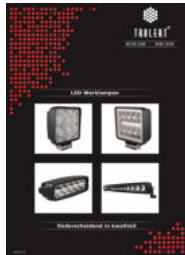

Creating safer roads together.

We work with the TRALERT® Referral Policy for Dealers. International inquiries will be forwarded to the Dealer that controls that region.

Tralert® your LED specialist

In addition to the LED marker lights, Tralert® further offers numerous other products within the field of LED vehicle lights. Underneath, you will find a selection from our range LED solutions:

LED Work lights

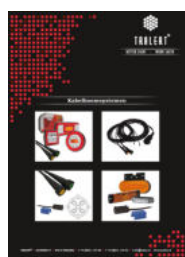

LED Rear lights

LED Interior lights

LED Warning lights

Wiring systems

**TRALERT®**

BETTER LIGHT - WORK SAFER

Tralert® your LED specialist

Tralert® offers a wide choice of Marker lights, these lights can be divided into the following subcategories:

- LED Marker lights
- LED Side indicators with marker light function
- LED Side indicators without marker light function
- LED Stalk lamps
- LED Number plate lights
- Reflectors

You will find all basic versions in this catalog. These basic range is already very wide, but do you have specific wishes regarding connectivity, cable length or other custom-made solutions? Let us know, we will check the possibilities and we will workout a proposal.

The basic versions are equipped with the following connectors & standard cables:

- The version without cable. This version can be connected by means of sliding connectors, these connectors are included. Versions without cable can also be produced with a cable on request, the length of this cable can be made to measure. This custom-made solution can not be ordered per piece but per multiple, the purchase number will be in consultation.
- The version with cable. Mostly the cables do have a length of 50cm. The length can, as with the previous option mentioned, also be custom made. Certain minimum purchase numbers also apply, these are determined in consultation.
- The version with a DC connector 0.75mm². This connector is a commonly used and is easy to install. This type of connector is often used with the Aspöck cable harnesses based on DC cables of 0.75mm². The versions in this catalog can then be exchanged 1 to 1 or used on the Aspöck cable harnesses. In addition, these connectors can also be used on the Tralert® cable harnesses.
- The version with a DC connector 1.5mm². This connector is also a commonly used and easy to install connector. This type of connector is often used with the Aspöck cable harnesses based on 1.5mm² DC cables.

If you still need a different connection, let us know. We can mount almost any type of connector for you.

LED Side Marker / Side Indicator Lamp 12/24v

Regulation 48 contains new guidelines on direction indicators; it stipulates that, for trailers and semi-trailers, three side indicator lamps must be located on the side of the vehicle, unless three side marker lamp with integrated Cat.5 indicator are fitted.

On pages 23 to 26 you will find our range of side indicators or flashing marker lights. These are available in various sizes and designs and are available as category 5 and category 6 indicators.

Below you will find important dates for when the new regulation comes into place as well as brief requirements:

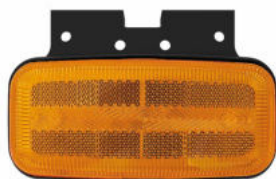

From November 2017: New trailers that have yet to be type approved will have to meet the new requirements of regulation 48.06

From October 2020: ALL new built trailers must meet regulation 48.06

BETTER LIGHT - WORK SAFER

LED Stalk Marker Lamps 12/24v

- Available with a clear lens for an old school retro look and a frosted lens for a modern look
- Available with a short or long angled arm
- 50cm cable (2 x 0,75mm²)
- IP68 waterproof
- Multivoltage 12/24v
- The articles that have an article number ending in RW or A are provided with an E-marking and thus provided with the correct homologation to be used as a stalk lamp (RW extension) or as an indicator (A-extension). The lamps ending in RA do NOT have an E-mark, they are generally used for styling.
- Dimensions short version: $\varnothing 79 \times 107\text{mm}$
- Dimensions long version: 192,5 x 168 x 87mm
- 2 year warranty

Daytime running lamp wiring component

- Wiring component for the 80AW12 & 80AW24
- This unit resets the daytime running lights by 50% in brightness when the indicator is switched on

Cable version:
DRL-HOTDOG

TRALERT®

BETTER LIGHT - WORK SAFER

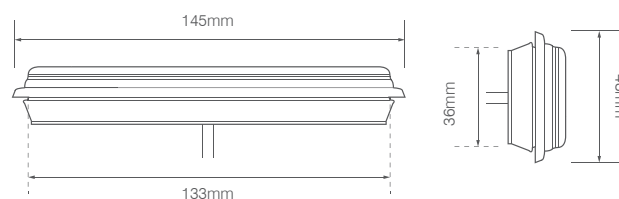

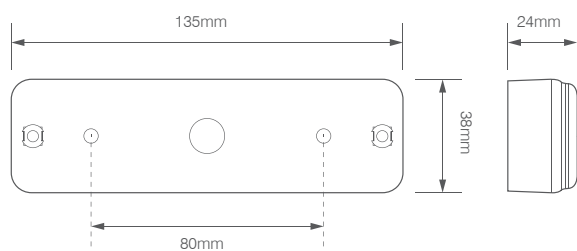

LED Front marker light with indicator 12/24v

135-Series

Specifications

Description	135-series Front marker light with indicator, has an E-mark and is available in surface or recess mount
EMC suppressed	Yes
Light colours	White / amber
Size 135AWME	135 x 38 x 24mm
Size 135AWMGE	145 x 48mm
Cut out size 135AWMGE	133 x 36mm
IP rate	IP67
Current draw 12v	Front marker.: 0,02A / indicator: 0,27A
Current draw 24v	Front marker.: 0,01A / indicator: 0,15A
Warranty	5 year

LED Front marker light with indicator

- Universal Front marker light with indicator
- 12/24V (multivoltage)
- Surface mount

Cable version (40cm):	DC 0,75mm ² connection:	DC 1,5mm ² connection:
135AWME	N/A	N/A
