

BETTER LIGHT - WORK SAFER

# **LED Warning Lights**

# **Tralert® your LED specialist**

As European importer of exclusive LED vehicle light solutions, Tralert® is distinctive with its complete range of sustainable products, excellent service and professional technical support. Because of our specialization and focus we have grown into one of the largest suppliers in our industry in a short period of time. We represent various reputable manufacturers for the European market.

"It is our mission to make a contribution through the use of LED technology to deliver the safety and visibility of road users"

BETTER LIGHT - WORK SAFER

#### **Extensive range of certified products**

With our LED vehicle lighting we focus on both the 12V and the 24V market. Our product range includes:

- LED Work lights
- LED Flashers
- LED Rear lights
- LED Marker lights
- LED Interior lights
- LED Warning lights
- Arrow signs
- Harness systems

For the most up-to-date range, please visit our website: www.tralert.nl

#### Proven quality

With the Tralert® range you purchase proven quality. The products comply with the applicable standards such as European homologation (E-standards), have an IP56 to IP68 classification, EMC suppression, ECE-R10, ECE-R23 and ECE-R65, EN12352 and EN50293.

#### **Quick delivery**

All products are delivered from our logistics centre in Didam (The Netherlands). 95% of all products are available from stock, so that you have the products the next day. We deliver to:

- Truck & trailer part dealers (24V)
- Automotive (12V)
- Manufacturer of mobile roadblocks
- Bodyshops (1st mounting)
- Trailerbuilders
- Intralogistics companies
- Earth-moving manufacturers
- Manufacturers of agricultural machines
- Government

# **Tralert® the LED specialist**

#### **Distribution support, Technical support**

In addition to the professional sales team, we additionally support you with our expert technical department. This creates the possibilty to act and develope immediately to customer requests and given suggestions. Many products we produce can be made with customized features on request.

#### **Dealerships**

Interested in becoming a dealer of the TRALERT® Portfolio? Contact TRALERT® to see dealership opportunities. We are capable to support you actively with sales, tailor-made marketing and product training.

#### Creating safer roads together.

We work with the TRALERT® Referral Policy for Dealers. International inquiries will be forwarded to the Dealer that controls that region.

# **Tralert® The LED specialist**

In addition to the LED Warning lights, Tralert® further offers numerous other products within the field of LED vehicle lights. Underneath, you will find a selection from our range LED solutions:

**LED Work Lights** 

LED Marker Lights

**LED Interior Lights** 

**LED Rear Lights** 

**Harness Systems** 

# **ECE-R65 Warning Lights for vehicles**

#### When do vehicles need R65 certified Warning Lights?

The European regulation ECE REG 65 applies from 1 March 2009. These regulations apply to acoustic and optical signalling on newly delivered, towing and towed vehicles. From 1 March 2014, the regulations are mandatory for both new as currently driving, towing and towing vehicles.

#### When do vehicles need (yellow) Warning lights?

For the following activities or circumstances, a vehicle carries a yellow flash, warning or flashing light if there is a chance that the vehicle will not be noticed in time by other road users:

- Work to provide assistance on or alongside roads with vehicles that are equipped for this purpose.
- Work at, on, in or above roads, including snow removal machines.
- Work with equipped motorized vehicles for assistance and repairing, salvaging and towing vehicles.
- Transport of indivisible cargo vehicles insofar as it concerns vehicles for which exemption has been granted under the vehicle regulations, regarding the dimensions of these vehicles or their cargo.
- Supervising transports for which an exemption has been granted, insofar as this guidance derives from the exemption and this is done with specially equipped vehicles.
- Supervising military columns.
- Driving with agricultural or forestry tractors and motor vehicles with a limited speed, or trailers moved by these vehicles, which, including the load, are wider than 2.60 m.

#### ECE-R65 guideline description:

Yellow Beacon or flashlights consisting one set of yellow warning lights.

- The set must comply with ECE regulation 65 is certified accordingly.
- The set is mounted in a way that the light signal can be detected from a distance of 20m around the vehicle. This is measured at 1.5m above the road surface.

#### For which vehicle categories:

- Vehicles that at least have 4 wheels and are used for transporting people (Cat. M1, M2, M3)
- Vehicles that at least have 4 wheels and are used for transporting goods (Cat. N1, N2, N3)
- Trailers (Cat. 01, 02, 03, 04)
- Agricultural and forestry tractors (Cat. T)
- Off-road mobile machines (Cat. G)

# **LED Warning light slimline 12/24v**

# **SF11**-Series

**synchronization**: Connect the yellow wires to synchronize the flash units. Note that each flash is set to the same flash pattern for synchronization to occur.

Pattern selection: Connect the blue wire to the red (+ VDC) for selecting the flash patterns.

- $\begin{array}{lll} \hbox{-}\ 1\,\text{sec. against red} & \hbox{-}\ > \text{next flash pattern} \\ \hbox{-}\ 1\sim3\,\text{sec. against red} \hbox{-}\ > \text{previous flash pattern} \\ \hbox{-}\ 5\,\text{seconds against red} \hbox{-}\ > \text{the flash is switched off} \end{array}$

Ground (- VDC) (+ VDC)

**Synchronization & Pattern selection**: First adjust all flash units to the desired flash pattern. This setting is made as follows:

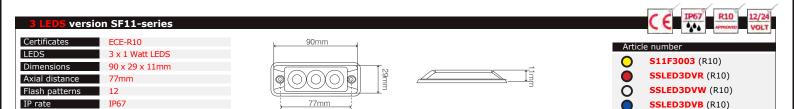

- 1 sec. against red -> next flash pattern - 1 ~ 3 sec. against red -> previous flash pattern

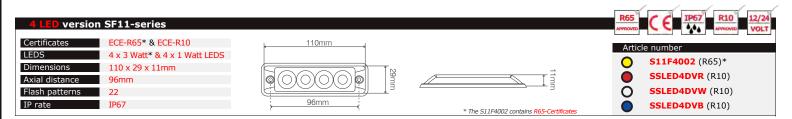

- 5 seconds against red -> the flash is switched off

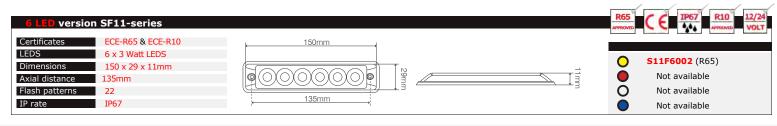

Then connect all yellow wires to achieve synchronization.

**Dim function** (optional): Connect all white wires and then connect them to ground with a switch. In this way the day and night function can be selected.

## **LED Warning lights slimline 12/24v**

SF07-series

(- VDC)

Plus (+ VDC)

Pattern selection: Connect the yellow wire for 1 second with the red wire to select the next flash pattern.

 $\begin{array}{c} \textbf{Synchronization:} & \textbf{Connect the grey wires (group 1),} \\ \textbf{subsequently connect the white wires of group 2. Interlink} \\ \textbf{both groups (1 \& 2) to establish synchronization.} \\ \end{array}$ 

To select a next pattern, interlink the yellow wire of the grey group with the red wire.

# **LED Warning lights portfolio**

Tralert® offers a wide range of LED warning lights including directional warning lights, warning beacons and lightbars. The LED flashing lights and LED flash bars are all ECE-R65 certified, major part of Tralert® LED flash units are likewise ECE-R65 certified.

Tralert® products have been carefully selected by our technical department and added to our portfolio. We select our lights based on Certifications, materials used and product finish, in short: only quality light solutions.

## **LED Warning Beacon 12/24v**

**ZL2**-Series

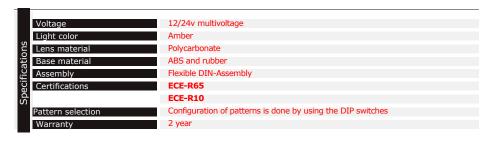

The ZL2-Series is an ECE-R65 approved rotating warning beacon. With the low base this rotating beacon lamps are in particularly recognizable. In low installation height situations, the ZL2-Series offers the perfect solution. Determination of the Flash pattern can be established by using DIP switches.

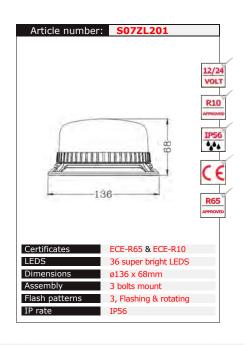

The rotating warning beacons are equipped with flashing and rotating patterns. The LEDS are carefully placed behind a parabolic lens which creates maximum light distribution.

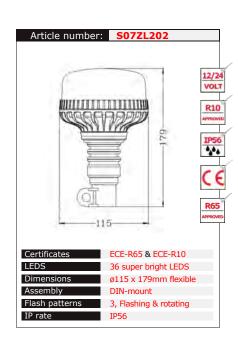

The amber lens is firmly screwed on the base and secured by a decent rubber seal. This combination makes the ZL2-Series splash water proof (IP56).

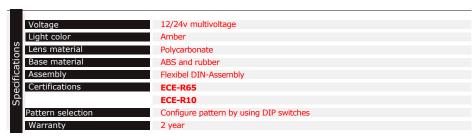

# LED Warning Beacon 12/24v

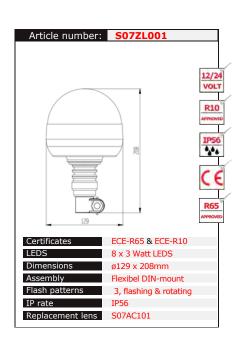

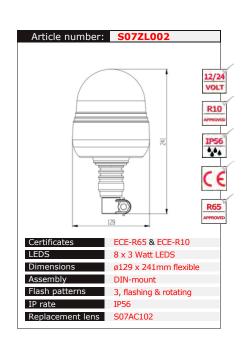

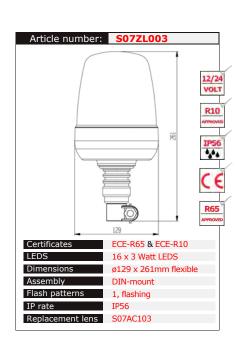

The ZL & ZL3-Series are equipped with high-quality high-power Osram LEDS. The Flash pattern can be set by using sustainable DIP switches. All flash crowns are equipped with 8 LEDS. This in combination with the powerful reflector creates excellent visibility while rotating. The materials used comprehensivily tested to assure the reliability of these warning beacons.

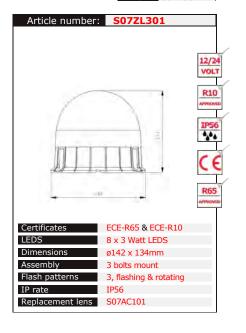

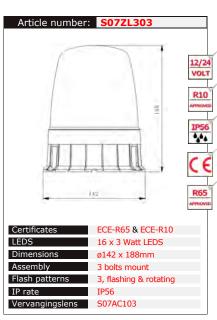

# **LED Warning Beacon 12/24v**

# ZL & ZL3-Series

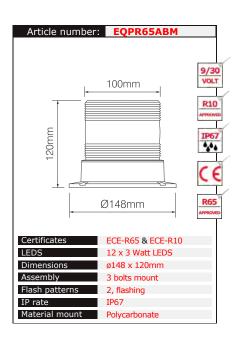

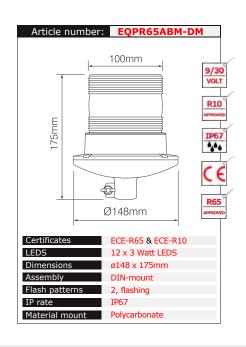

# **LED Warning Beacon 9/30v**

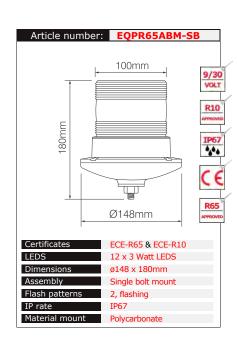

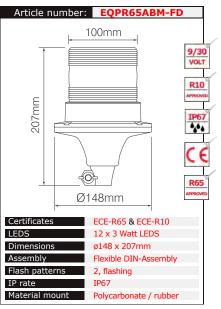

# **EQPR-Series & EQR65-Series**

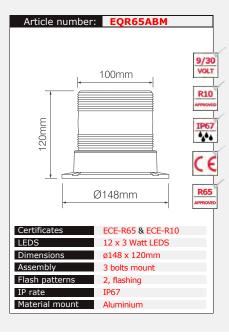

The EQPR and EQR65 series are both provided with ECE-R65 Certificates. The EQPR series is equipped with a Polycarbonate lens and strong Polycarbonate mount. In addition to the base foot with 3 bolt Assembly, various other assemblies are available such as a flexible DIN assembly or a magnet Assembly.

	feet 113mm)

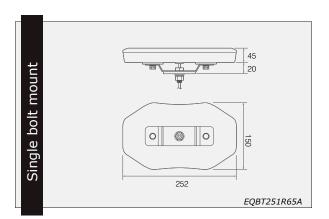

The LED EQBT-Series is ECE-R65 certified and equipped with high-power LEDS that ensure crystal clear visibility. The EQBT-Series is divided into 3 collections; the mini flashbars (up to 417 mm), the sub-flashbars (starting at 621 mm) and the full flash bars (starting at 862 mm).

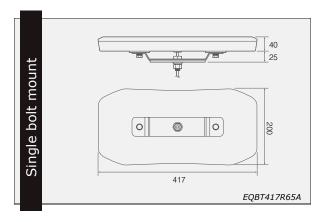

The mounts of the lightbars are available in single bolt mounts and for the mini lightbars a Magnet suction mounts is made. Models starting from 621 mm are provided with a free adjustable stable steel mounting base.
