

# Transform your existing machines with automated age estimation

ICU Lite integrates into a machine to automate age restricted sales & services.

ICU Lite provides age estimation technology in a compact, plug-in device.

Simply plug ICU Lite into your individual host machine e.g. a self-service checkout, gaming machine or kiosk. Communication is then achieved with a simple API call.

Conforms to **CHALLENGE 25**

Protects children from accessing age restricted goods or services

Enhances customers' experience and increases throughput

Unlimited age checks for a one-off fee

-  No internet required
-  No recurring fees
-  World leading accuracy

### Prevent underage sales

ICU Lite is highly accurate, it outperforms humans across all age ranges, with a proven success rate in detecting under 18s

### Enhance customer experience

Enhances customers experience and increases throughput

### Meet licensing objectives

Secure licences, protect children from harm and prevent crime & disorder

## Did You Know...

Fit for deployment in a Challenge 25 situation, ICU Lite has been independently tested by the Age Check Certification Scheme (ACCS).

The results showed ICU Lite underestimates age on average by just 0.19 years.
