Drapes and sets

Safety

Practicality

Comfort

- Safely strong – impermeable
- Plenty of absorbency – extra large absorbent patches
- Very low linting
- Very good drapeability
- Stays well in place, is not slippery
- Low reflections
- High puncture resistance – very durable

- 1 Large and very efficient absorbent patches, new structure
- 2 Blue/grey nonwoven, very low linting
- 3 A highly elastic multicomponent pe-film moisture barrier – puncture resistance
- 4 White backsheet with very low linting – more comfort to the patient, more strength

Complies to EN 13795.

Easily identifiable integrated tube holders in drapes with absorbent patch

Material chart

-  Absorbent and impermeable multilayer material
-  Absorbent and impermeable 2-layer material
-  Absorbent and impermeable reinforcement material (absorbent patch)
-  Polyethylene film
-  Elastic material
-  Adhesive edge

Universal set with Mayo stand cover, absorbent patches size Large

Notes

X-ray detectable
towels, swabs and sponges

evercare® X-ray

XRD GAUZE

Made of EN 14079 cotton gauze evercare® abdominal swabs & laparotomy towels and sponges offer

- a wide range of products
- pvc-free X-ray thread safely woven into the fabric
- heatsealed lint-free easy-to-open wrap
- dispenser boxes for good storage management
- color coding for easy product identification
- numeric control system for counting assistance with following information
 - dry weight of the product
 - number of individual swabs/towels
 - size of the individual swabs/towels
 - number of layers in the product
 - control batch number

More safety with sewing – abdominal swab

- The risk of loose threads much reduced with products sewn so that access to cut edges is prevented

More absorbency with more layers

- all laparotomy towels have 4 layers
- the material used is finest quality 20 thread gauze

More safety with latex-free sponges

- each sponge housed in its individual compartment
- double packed in 2 layers of peel-open pouches

XRD NONWOVEN

Made of EN 1644 nonwoven high quality viscose/polyester evercare® abdominal swabs & laparotomy towels and sponges offer

- high absorbency
- low linting
- cost efficiency
- X-ray thread safely welded to the nonwoven
- abdominal swabs wrapped into a sealed lint-free easy-to-open wrap
- dispenser boxes for good storage management
- latex-free sponges double packed in 2 layers of peel-open pouches
- color coding for easy product identification
- numeric control system for counting assistance contains following information
 - dry weight of the product
 - number of individual swabs/towels
 - size of the individual swabs/towels
 - control batch number

Surgical gowns

Uncompromising protection – evercare[®] surgical gowns

Comfortably in control with evercare[®] Original surgical gowns

Made of breathable medical fabric which has for decades been considered as industry standard for medical gowns evercare[®] Original provides comfort you feel. The fabric has a soft textile-like structure and features advanced technology: fluid resistant and repellent barrier that breathes.

Highly resistant and repellent SMS-material for evolving needs of medical professionals evercare[®] XP

Our SMS technology utilizes several layers of fabric to provide a very high level of repellency. The fabric features several tightly packed meltblown layers sandwiched between strong spunbond outer layers. An advanced barrier to body fluids and microbes.

Irrespective of the gown material evercare[®] gowns have different protection levels for different needs

- **Basic** – with single back for dry operations of short duration
- **Standard** – with widely overlapping back, the universal gown” for dry operations
- **Special** – with widely overlapping back and breathable film/nonwoven reinforcement in sleeves and front for wet operations, for orthopaedics
- **Extra** – with wide pe-hem for urological procedures

Large size velcro strap at the neck for secure adjustment

Comfortable, user friendly design providing ease of movement

The carefully designed features in both gown types are largely the same

- Comfortable, user friendly design providing ease of movement
- Excellent sizing
- High quality cuffs for improved comfort
- Large size velcro strap at the neck for secure adjustment
- All evercare® gowns meet EN13795
- All evercare® gowns are available with or without hand towels
- State-of-the-art packaging system with handy functional dispenser and labeling in accordance with EN980 and EN1041
- Barcoded removable labels for improved traceability

evercare® Original – spunlace nonwoven

Notes

Protective apparel

Dressed to care

– evercare[®] protective apparel

The use of protective clothing is an essential element of infection prevention and control.

Many items of protective clothing are incorporated within the concept of universal precautions – the precautions necessary to reduce exposure to blood or body fluids. Protective clothing is also used to help prevent the transmission of micro-organisms other than blood-borne viruses – for example, methicillin-resistant *Staphylococcus aureus*, *Staphylococcus aureus* and *Mycobacterium tuberculosis*.

evercare[®] offers a wide selection of single use medical devices for securing the safety and comfort of staff, patients and visitors. A fresh start every time.

Modern scrubs

evercare[®] scrub assortment contains modern medical uniforms consisting of a short-sleeved shirt and pants with and without cuffs in comfortable unisex design and wide selection of sizes. Scrubs also include a waist-length short/medium length or long sleeved jacket with no lapels and stockinette cuffs, a "warm-up jacket". evercare[®] scrub suit shirts and pants complies to the EN standard 13795 for Clean Air Suit. evercare[®] scrubs provide comfort and security of wearing fresh scrubs every day.

Isolation and protective gowns

Different tasks call for different needs of protection. The evercare[®] isolation and protective gown assortment offers solutions from gowns made of different grades of polypropylene to polyethylene coated gowns – for uses ranging from situations with little or no contact with blood or body fluids to where a moderate amount of contact with blood or fluids is anticipated. The anticipated risk of exposure to fluids guides the choice. Choice of high quality raw materials and carefully considered details guarantee that evercare[®] offers the best of protection.

Surgical masks and caps

Professional protection by evercare®

Surgical masks are intended to be worn by health care professionals during surgery. They should be worn at other times to catch the bacteria shed in liquid droplets and aerosols from the wearer's mouth and nose.

European Standard EN 14683 specifies the construction and performance requirements, and test methods for surgical masks intended to limit the transmission of infective agents from staff to patients and (in certain situations vice-versa) during surgical procedures in operating theatres and other medical settings with similar requirements.

Key requirements of EN14683

1. Bacterial Filtration Efficiency

Determination of the filtration efficiency of the face mask. The higher the BFE %, the better the protection.

Classification: BFE = ≥ 95 % TYPE I
BFE = ≥ 98 % TYPE II

2. Breathing Resistance

Determination of the airflow resistance of the surgical mask. The lower the differential pressure, the higher the breathing comfort.

Classification: TYPE I & II (non splash resistant) = < 29.4 Pa/cm²
TYPE IR & IIR (splash resistant) = < 49.0 Pa/cm²

3. Splash Resistance

Determination of the resistance of the mask of potentially contaminated fluid splashes.

Classification: TYPE I & TYPE II not applicable
TYPE IR & TYPE IIR >120 mmHg*

*120 mmHg is a minimum value.

It corresponds to the average systolic arterial blood pressure, and intends to protect against ruptures in small arteries causing small sprays of blood.

evercare® surgical mask assortment includes a selection of Type II and Type IIR surgical masks.

evercare® surgical masks complies to the EN14683:2005 for surgical masks.

evercare® surgical masks are soft, comfortable and provide excellent fit.

Surgical masks and caps

Gloves

Medical gloves

Purpose

- To protect the patient and the professional
- To prevent microbes getting attached to hands and spread of infection via hands
- To protect the hands from
 - Occupational accidents
 - Cleansing agents
 - Chemicals
 - Stick injuries

Choice of glove

Natural rubber latex

- When good protection against microbes is needed
- When the glove is subjected to strong mechanical stress
- When sharp objects are handled
- Long term use

Nitrile

- When good protection against microbes is needed
- Persons suffering from latex allergy
- Casting (glass fibre)
- Handling of cytostatics, chemicals

Vinyl

- When glove is not subjected to hard mechanical stress
- Short term general use

Use of gloves

- Medical gloves are always single-use
- They are used per procedure and per patient
- Depending on the situation either sterile or factory clean gloves are used
- Disposable gloves are neither washed nor disinfected

Use the gloves correctly

- Medical gloves are donned into clean, dry hands
- Hands are disinfected just prior to donning
- After disinfection hands must be allowed to dry before donning
- Hands may get contaminated when undonning the gloves, therefore hands must be disinfected also immediately after undonning
- In all cases involving contaminating materials attention must be paid to correct undonning
- The outer surface of the glove must not get into contact with skin
- When necessary double donning can be applied -> decreased risk of skin contamination while undonning (eg when handling cytostatics)

How to use hand disinfectant

Pour plenty of disinfectant into your cupped hands and start rubbing your palms together.

Take more disinfectant. Continue to disinfect fingers and nails and after that...

...rub around your right thumb clasped in your left palm and vice versa.

Continue rubbing palm to palm with your fingers interlaced.

Left palm over back of right hand and right palm over back of left hand.

Now disinfect both wrists. Finally let your hands air dry.

Vinyl Soft

Powder-free and powdered evercare® vinyl Soft glove offers practical protection for many applications. The 100 % synthetic glove is somewhat softer than the standard vinyl and has a good feel and performance. It is a good alternative for those suffering from Type I allergies.

Features

- DOP-free
- No latex proteins, good alternative for those suffering from Type I allergies
- Suitable for food handling, except for fatty food
- Available both powder-free and powdered
- Practical barrier for wide range of applications
- Very soft
- Good fit, feel and performance
- AQL 1,5

Quality standards

- Complies with EN 455

Vinyl gloves

Vinyl Stretch

Stretchy, natural white, latex free gloves have a more comfortable fit than standard vinyl gloves. They offer enhanced tactile sensitivity and a practical barrier of protection for a wide range of applications. They are also a good alternative for those suffering from Type I allergies.

Features

- DOP-free
- No latex proteins, low allergenicity potential
- Suitable for food handling except for fatty food
- Comfortable conforming latexlike fit
- Effective barrier and extra strength
- Enhanced tactile sensitivity
- Same colour as latex
- Economical protection
- AQL 1,5

Latex gloves

Latex inner coated

Latex Powder-free examination gloves offer ultimate comfort and protection, a perfect combination of strength, elasticity and slip resistance. Because of their thickness and elasticity they perform well in high-risk, heavy-duty situations. They fit comfortably like a second skin. The only downside to natural rubber latex examination gloves is that being a protein based compound they may cause allergic reactions and irritation in some people – including anaphylactic reaction.

Features

- Beaded cuff for easy donning and prevention of roll back
- Excellent and tactile sense
- Textured for improved grip
- Powder-free glove inner coated
- Low level of extractable proteins and chemical residue
- Food safe, suitable for handling foodstuffs
- AQL 1,5

Quality standards

- Complies with EN 455

Gloves

Nitrile gloves

Nitrile heavy duty, blue and X-long blue

On the market already for a long time nitrile gloves now have a new formula for increased softness and comfort and are even more closer to latex gloves in stretch, tactile sensitivity and performance. They are recommended for use in areas that may involve levels of stress.

Features

- 100% latex free – made from durable nitrile, eliminates the Type 1 allergic reaction associated with natural rubber
- Close to latex in stretch, tactile sensitivity and performance
- Designed to give a natural rubber-like feel
- Textured in finger tips for excellent grip in all situations
- Food safe, suitable for handling fatty foods incl. cooking, olive and cod liver oil
- AQL 1,0

Quality standards

- Complies with EN 455 and EN 374

Technical information

Type	Powder-free, unsterile
Material	Nitrile butadiene rubber (NBR)
Colour	Blue
Model	Ambidextrous, with rolled rim
Storage	Protect from heat, humidity, strong light and ozone
Size/overall length as per EN 455-2	XS, S, M, L and XL 240/290 mm
Impermeability as per EN 455-1	AQL 1,0
Durability in original package if stored as per din 7716, ISO 2230	5 years

Gloves

Nitrile gloves

Nitrile general use: rose, blue lilac and white

Comfortable, supersoft flexible powderfree nitrile gloves provide added safety in many applications. Designed with a special nitrile formulation they feel and fit like latex and allow full range of motion and excellent flexibility to minimise stress and fatigue. They do not contain natural rubber latex and are excellent alternative for those suffering from Type I allergies.

Features

- 100% latex free – made from durable, puncture resistant, protein and powder-free nitrile, eliminates the Type 1 allergic reaction associated with natural rubber latex
- Highly elastic and supersoft
- Rolled rim to facilitate easy donning
- Designed to give a natural rubber-like feel
- Textured in finger tips for enhanced grip in all situations
- Food safe, suitable for handling fatty foods incl. cooking, olive and cod liver oil
- Protects against a wide variety of chemicals
- AQL 1.0

Material comparison

	Vinyl	Latex	Nitrile
Material	Polyvinyl chloride, a synthetic polymer	Natural rubber latex from the rubber tree <i>Hevea brasiliensis</i>	Acrylonitrile butadiene, synthetic latex
Protection	Vinyl gives moderate protection due to limited strength and chemical resistance.	Due to strength, elasticity and chemical resistance latex gives very reliable and effective protection	Nitrile is strong, elastic and resistant to a wider range of chemicals than vinyl or latex. It offers excellent protection
Strength	Limited. Minimum force at break 3,6 N as per EN455:2	Superior. Minimum force at break requirement 9 N as per EN455:2	Excellent strength and puncture resistance. Minimum force at break requirement 6 N as per EN455:2
Elasticity	Low to medium. Moderate flexibility	High level of elasticity, memory and elongation	Medium to high, conforms to hand during use.
Durability	Moderate	Highly resistant to tears	Highly resistant to punctures and tears. If punctured tear easily detectable
Chemical resistance	Resistant to acids, bases and common alcohols	Good to excellent for a number of chemicals, not recommended for use with oils	Good to excellent with a number of common chemicals. EN374 compliance becoming more and more common
Chemotherapy use	Not recommended	Normal examination glove not recommended	Heavy duty nitrile recommended
Compatibility with lotions	Water and glyserine based only	Water and glyserine based only	Water and glyserine based only
Possible glove related reactions	Irritant Contact Dermatitis Chemical allergies (Type IV)	Irritant Contact Dermatitis Chemical allergies (Type IV) Latex protein allergies (Type I)	Irritant Contact Dermatitis Chemical allergies (Type IV)
Glove powder	May cause a wide variety of reactions for patients and staff	May cause a wide variety of reactions for patients and staff	May cause a wide variety of reactions for patients and staff
Fit and comfort	Good, conforms to hand	Excellent, conforms to hand	Excellent, conforms to hand
