WELCOME NOTE

ProtecX Medical is a leading UK manufacturer with over 20 years of experience in the radiation protection sector. From our factory in Hitchin, we passionately handcraft products, which we supply internationally through a network of trusted partners. With a dedicated approach, we can boast some of the quickest delivery times in the market; giving you access to the quality products you need to keep you safe.

We, along with our US parent company; Burlington Medical take pride in developing products and innovating services to meet your growing needs. Looking after our customers is paramount and we believe that buying from us should be a pleasure. Our warm and friendly approach goes hand in hand with product quality and service efficiency.

Our underpinning ethos will always be, protecting healthcare staff from the harmful effects of cumulative exposure to scatter radiation; whilst offering maximum comfort.

ProtecX Medical is ISO 9001:2015 accredited.

OUR APRONS

From good to better to best, all of our aprons are superior to the competition.

YOUR APRON QUALITY DECISION IS A
HEALTH QUALITY DECISION.

We recognise that our customers have complex needs, ProtecX offers a variety of options to suit every budget level. To find the perfect solution for you, our team of friendly regional account managers can do on-site fittings.

Good
STANDARD APRONS

Featuring our high-quality craftsmanship and materials, our standard aprons are budget-friendly and come in basic styles and colours.

Better
CUSTOM APRONS

Our custom handmade aprons are built with the same craftsmanship, but offer all the styles, design choices and comfort options you could want.

Best
THE TAILORED APRON

Every panel is precisely cut to your exact measurements, ensuring the perfect fit and maximal protection without adding an extra ounce of protective material.

2 year warranty

REPAIR AND ALTERATIONS SERVICES

REPAIR

We take great pride in the quality of our products and their ability to stand up to the demands of the clinical environment. Sometimes accidents happen and circumstances can change. We are here to help keep your aprons in working condition and offer a wide range of repair and alteration services to ProtecX products.

DISPOSAL

The protective material used in radiation protection aprons and accessories contains heavy metals that attenuate scatter radiation and help keep you from the detrimental effects of radiation exposure. The problem is that those same heavy metals are not very friendly to the environment and should be handled properly when they are no longer in use. ProtecX's One for One program; for every apron you've purchased in the last 12 months we will dispose of an apron at no cost.

PROTECTIVE MATERIAL GUIDE

All core materials are compliant to the PPE Regulation (EU) 2016/425 and meet the stringent world standard IEC 61331-1:2014 (BBG* test method)*.

LEAD FREE BI-LAYER

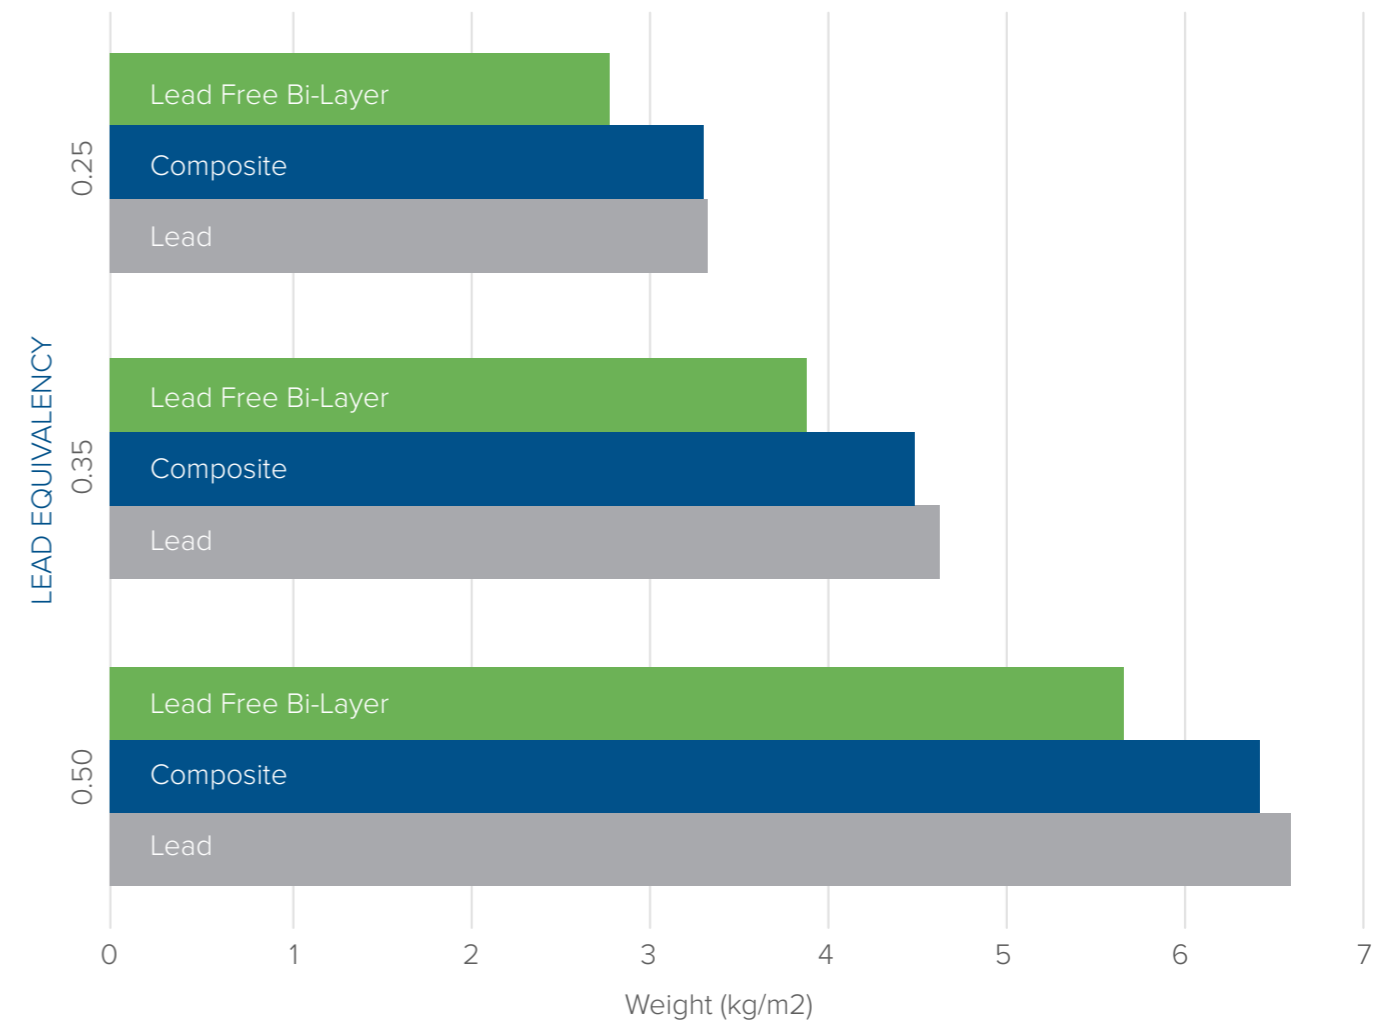

A lead-free protective material. Featuring Bi-Layer Technology, making this our lightest weight radiation protection material.

COMPOSITE

This protective material is made from a combination of antimony and lead. It is lighter weight and maintains strong protective qualities.

LEAD

Traditional lead offers a low cost, dependable heavy-duty solution that can be used for gamma-radiation (nuclear medicine) and x-ray procedures (CT-assist, thorax) exceeding 120kV.

*Please contact us for attenuation data, certificates and further evidence of our compliant materials.

ONE PIECE APRONS

COAT

A special procedure apron designed to overlap at the front and fasten with side release buckle and velcro. Supplied with our lumbar support belt to help distribute weight.

PRODUCT CODE 1101

FULL FRONT OVERLAP ONE PIECE APRON

These special procedure aprons available in one or two-piece have been designed to fully overlap at the front from axilla to axilla. Designed to offer optimum protection with minimum weight these aprons are ideal when a high level of protection is required.

Supplementary panels at the shoulders maintain the total lead equivalency of the front of the apron, reducing the overall weight.

One-piece apron supplied with our lumbar support belt.

PRODUCT CODE 1109

THEATRE TABARD

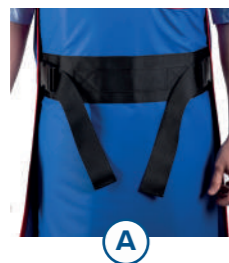

A tabard style apron that fastens with easy release buckles at both shoulders and sides. This style provides complete radiation protection both front and back.

Option A: Fastens at the front.
Option B: Fastens at the back.

Option A: Fastens at the front.

Option B: Fastens at the back.

PRODUCT CODES 1108A / 1108B

A

B

TABARD

The tabard-style apron is designed to fasten on one shoulder with velcro and a side release buckle and velcro at the side seam.

Supplied with our lumbar support belt to help distribute weight.

Available to fasten on the left or right.

PRODUCT CODES

1105 Fastens on left shoulder and side seam, closed on right.

1106 Fastens on right shoulder and side seam, closed on left.

ESSENTIAL

The essential apron has been designed to simply slip on and fasten with an easy release buckle on the left shoulder and a variety of fastenings at the side/back.

Option A: 100mm velcro fastening on both sides.

Option B: Elastic belt which fastens with velcro at the back.

Option C: 50mm webbing belt which fastens and adjusts with a side release buckle.

PRODUCT CODES 1110A / 1110B / 1110C

A

B

C

PRO EURO

The EURO is a one-piece apron with full front and back protection that opens in the back. This apron provides superior weight distribution and back support.

PRODUCT CODE PRO-EURO

FRONTAL APRONS

FRONTAL THEATRE

A frontal style apron with straps designed to cross over at the back and fasten at the front.

PRODUCT CODE 1107

THEATRE

Frontal style apron with straps designed to cross over at the back and fasten on the front. This style provides protection in the back panels.

PRODUCT CODE 1107HB

UROLOGY THEATRE

A frontal style apron designed specifically to offer complete radiation protection when seated for urological procedures.

PRODUCT CODE 1111

DENTAL APRON

This dental apron is designed to offer protection for the patient seated during dental x-rays. Secured at the back with webbing and buckle fastening.

One size only.

VESTS

TWO-PIECE COAT

The coat style partially overlaps at the front with velcro fastenings.

This is an excellent generic 2-piece garment ideal for multiple wearers.

The one-piece kilt design features a side pocket, overlaps at the front and fastens with velcro and a side-release buckle.

PRODUCT CODE 1102

FULL FRONT OVERLAP TWO-PIECE APRON

The coat style top overlaps at the front with velcro fastenings.

This is an excellent generic 2-piece garment, multi plus wears.

The one-piece kilt design features a side pocket, overlaps at the front and fastens with velcro and a side-release buckle.

Our featherlite garment features the same design however, has half the stated protection in each front panel, offering full protection when wrapped from axilla to axilla. This design is lighter in weight, but should be worn correctly for complete protection.

PRODUCT CODES

1102FF Full front overlap two-piece

1102FFF Featherlite option (.35 protection)

PRINCESS VEST

Princess vests are specifically designed for females. This vest is contoured around the bust, providing better fit and protection for side breast tissue and the axillary region.

The Princess vest is light weight and features a covered zip fastening, and integrated elastic waistband that hugs the lower back; resulting in a more comfortable fit.

PRODUCT CODE PCV

PRO ZIP

The Pro Zip is a lightweight, front and back protection option; which features a covered zip down the centre of the vest.

PRODUCT CODE PZV

TWO-PIECE TABARD

The tabard top fastens towards the back with a quick release buckle at the shoulder, and velcro at both sides.

PRODUCT CODE 1103

PRO-PK TWO-PIECE APRON

Pro-Pk is an excellent 2-piece garment with front and back protection. This garment is designed to help distribute the weight away from the shoulders providing excellent back support.

PRODUCT CODE PRO-PK

KILTS

STANDARD KILT

The standard kilt design partially overlaps at the front and fastens with velcro and side release buckle. All panels include the stated PB protection, making this ideal for multi-wearers.

PRODUCT CODE 1102K

FULL FRONTAL KILT

The full frontal kilt has half the stated protection in each panel and offers full protection when wrapped from axilla to axilla. This design is lighter in weight, but should be worn correctly for complete protection.

PRODUCT CODE 1102KF

ACCESSORIES COMFORT OPTIONS

BACK SUPPORT BELT

Designed to help distribute weight whilst supporting the lumbar back.

Available in navy or black and the following sizes:
XS/S/M/L/XL

PRODUCT CODE 1300

CINCH BELT

This patented closure system lifts the weight from the back and the shoulders, whilst supporting the lumbar spine. Revolutionary design allows closure of the belt by velcro and ripcord. It can also be worn under a lead apron.

Available in: S/M/L/XL
PRODUCT CODE 1303

MAX COMFORT BELT

This webbing support belt has been designed to allow the user to fully adjust the velcro to ensure a perfect fit. Permanently fitted into your kilt.

Available in: S/M/L/XL
& custom fit.
PRODUCT CODE 1304

ACCESSORIES

ESSENTIAL PROTECTION

THYROID PROTECTION COLLAR

Thyroid protection collars are available in three sizes: small, medium and large. Each size is available in 0.35mm or 0.50mm lead equivalency. Fastens by velcro or magnets.

These can be personalised with one line of embroidery, up to 12 characters, at extra cost.

To prevent the loss of thyroid collars, we offer the option to have a collar attached to the apron using a soft webbing and buckle. The collar can be removed as and when required.

PRODUCT CODES

- 1200** Thyroid collar
- 1200-2** Bib thyroid collar

COTTON THYROID COLLAR COVER

Designed for use in conjunction with thyroid collars, to provide extra comfort and cleanliness.

100% pure cotton.

Available in black or white.

PRODUCT CODE 1205

DISPOSABLE THYROID COLLAR COVER

Designed to fit ProtecX thyroid collars, this cover provides extra comfort and cleanliness and helps with infection control.

Easy to use and dispose of after use.

Available in boxes of 50.

PRODUCT CODE 2517

LEAD CAP

This breathable lead cap offers cranial protection against harmful scatter radiation.

Velcro or tie fastening at the back allows for secure fitting.

Available in three sizes.

PRODUCT CODES

- 1213-S** Small
- 1213-M** Medium
- 1213-L** Large

LEG PROTECTORS

These frontal style leg protectors offer complete radiation protection to the legs when either seated or standing very close to the image intensifier.

These leg shields have been introduced to our range so that when worn with our other protective aprons and accessories virtually the whole body can now be protected.

Available in one size. Lengths: (knee to ankle).

Short 35cm / Regular 40cm / Long 45cm

PRODUCT CODE 1208

ARM SHIELD

Designed to protect the upper arm and shoulder when working near to the main beam.

This arm shield can be worn in addition to any ProtecX aprons and can be worn on the left or the right.

PRODUCT CODE 1211

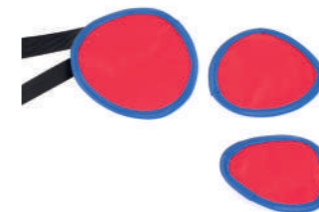

PROTECTIVE GONAD APRON

Flexible covered shields with fully adjustable velcro/webbing belts.

Available in 0.50mm lead equivalent.

PRODUCT CODES

- 1113-M** Adult 1 (L)40cm x (W)40cm
- 1113-L** Adult 2 (L)46cm x (W)50cm
- 1113-T** Child 1 (L)20cm x (W)25cm
- 1113-C** Child 2 (L)31cm x (W)31cm

OVARY SHIELDS WITH WEBBING BELT

Set of triangular shaped gonad shields in three sizes. Supplied with adjustable webbing belt.

Available in 0.50 mm lead equivalent.

PRODUCT CODE 1207

EYEWEAR

Your eyes are a critical tool for the work you do, and your vision is an important part of your life and wellbeing.

Scatter radiation poses a serious health risk to your eyes, and every reasonable action should be taken to protect them.

ProtecX offers an extensive line of premium eyewear that is designed for maximum comfort, weight distribution and style. The variety of frames and features ensures there is a style to fit every need.

All radiation safety glasses are made with Schott SF6 high index lenses for the clearest vision with 0.75mm PbEq protection (side shields with 0.50mm PbEq).

NO-FOG COATING

No-Fog coated lenses are essential for your radiation safety glasses. They offer an unparalleled level of fog resistance when introduced into a humid environment. The no-fog coating is not available with prescription lenses.

FRAME ENGRAVING

Personalise your glasses with engraved frames to protect your investment. Engraving can be done on many of our frames so you can easily identify which glasses belong to you. There are limitations on the number of characters each frame can hold.

PRESCRIPTION LENSES

There are several different prescription options for our Rx-labelled frames. Glasses are available for those needing single vision, bifocal, or progressive prescriptions.

We require the following information for prescription glasses.

PRESCRIPTION	PUPILLARY DISTANCE	SEGMENT HEIGHT
Single	Yes	No
Bifocal	Yes	No
Progressive	Yes	Yes

Put-Over style frames are available to those who'd like to still wear their regular Rx glasses.

SIZING RECOMMENDATIONS

Each frame has a general sizing recommendation. There is no substitute for trying frames on, but it is helpful to narrow it down to the best options for your needs.

PLEASE SEE OUR EXTENSIVE EYEWEAR CATALOGUE FOR ALL OUR OPTIONS.

GLOVES

RADIATION REDUCING GLOVES

Recommended in haemodynamics, endoscopy, radiology, neurology, urology, EP/cath lab, intensive care, orthopaedics and nuclear medicine.

XGUARD

Xguard gloves are natural rubber latex, radiation-attenuating gloves. They are intended to reduce scatter radiation exposure during fluoroscopic procedures.

FREEGUARD

FREEguard gloves are polyisoprene, radiation-attenuating, surgical gloves. They can be worn during operating room procedures without the need for additional surgical gloves.

Additional information

- Sterilised by ethylene oxide (ETO)
- Sterilisation expiration of 3 years
- Powder-free
- Sizes 6-9; half sizes available
- (XG60 sizes 7-9, half sizes available and size 10)

1 Box (5 pairs) / 1 Case (50 pairs)

STORAGE

WALL APRON RACK

Designed to allow proper storage of aprons by providing individual hangers for up to six aprons.

This product can be purchased with the hangers folding either to the left or right.

PRODUCT CODES

2409 Right fold for three aprons

2410 Left fold for three aprons

2401 Right fold for five aprons

2402 Left fold for five aprons

APRON WALL-MOUNT PEG RACKS

This wall-mounted peg rack is designed to hold frontal protection or front-and-back aprons. Each peg is 4" long and sits at an upward angle for safety and support.

PRODUCT CODES

WR1 One apron 6"W x 3"H x 4-5/16"D

WR2 Five aprons 17"W x 8"H x 4.5"D

WR3 Four aprons 19"W x 3"H x 4-5/16"D

WR4 Two aprons 12"W x 3"H x 4-5/16"D

WR6 Nine aprons 50"W x 3"H x 4-5/16"D

MOBILE SWIVEL ARM RACK

This rack is ideal for locations where walls cannot support the weight of several aprons on a wall rack. It can be positioned at any convenient location and be moved as required. Aprons can be easily selected, removed and replaced and the shoulder shaped arms prolong the life of aprons.

For 2-piece aprons an additional rack can be added to store the skirts below the tops, this rack is designed to work only with ProtecX rack 2415.

Both racks hold up to 12 aprons.

PRODUCT CODES

2415 Rack to hold up to 12 aprons

2416 Rack to hold up to 12 skirts

MOBILE APRON RACK

Designed to allow proper storage of aprons using individual hangers.

Each rail has two regular and two braked casters.

Available in two sizes.

NB - hangers are not included

PRODUCT CODES

2404 Holds up to six aprons (L)90cm x (W)56cm x (H)142cm

2405 Holds up to twelve aprons (L)99cm x (W)56cm x (H)142cm

HANGERS

These hangers have been designed to either remove from, or remain permanently fixed to, the hanging rail.

PRODUCT CODES

2407 Closed loop hanger m

SKIRT HOOKS

Hooks designed to hold skirts of two-piece aprons.

Compatible with all ProtecX arm racks.

Available in pairs.

PRODUCT CODES 2412

PROCEDURE ROOM SHIELDS

GRAYSHIELD EYE PROTECTION SHIELDS

The GrayShield eye protector has been designed to provide superficial anterior and lateral coverage to patients' eyes, during CT and general x-ray procedures. Independent x-ray transmission testing on the material shows an 80%+ dose reduction (50 kV to 150 kV). GrayShield can be safely disposed of in normal clinical waste.

PRODUCT CODE 2920

HEIGHT ADJUSTABLE MOBILE RADIATION PROTECTION SHIELD

Superior design and construction make this shield ideal for use in confined areas close to the tableside. Hand controls, attached to the optional accessory rail, allow personnel to operate within a safe zone created by the shield.

The 70cm wide lead acrylic window can be raised to a height of 190cm, for complete protection, or lowered to 115cm for access to the patient. The shield occupies minimal space when lowered after use.

The window is held in position by an internal counterbalance, so it has no apparent weight. This arrangement enables height adjustments to be made with ease.

PRODUCT CODE 2832

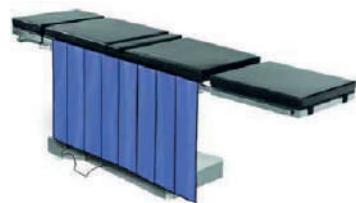

HEIGHT ADJUSTABLE FLEXIBLE MOBILE RADIATION PROTECTION SHIELD

This shield is suitable for patient or practitioner. A flexible 60 cm high x 70 cm wide protective curtain is height adjustable from 85 to 120 cm by virtue of a spring assisted telescopic column.

- Compact shield can be used to provide protection to patient or practitioner.
- Height adjustment is spring assisted between 85 cm and 120 cm for ease of use.
- A telescopic column supports a flexible 60 cm high x 70 cm wide 0.5 mm Pb curtain which can be locked at any height.
- A version with an additional 70 cm wide flexible curtain fixed at a low level is also available.

PRODUCT CODES

2830 Single curtain shield **2831** Twin curtain shield

CUSTOM TABLE DRAPES AND SHIELDS

The majority of scatter radiation comes from under the table. We can help you reduce this significantly when you use a table drape shield.

CONTACT US FOR A QUOTE

SWING OUT TABLE SHIELDS

- Double pivot design allows the drapes to conform to most table shapes.
- Quick and easy assembly with slide on drape design.
- Requires only 8" of railing for attachment.
- Lightweight aluminium construction.
- Universal design fits both sides of the table.
- Creates up to a 36" wing of protection under the table.
- 28" long panels come standard, but can be customised to your needs.
- 0.5mm lead equivalency.
- 8 panel design for ease of use with a C-Arm.

PRODUCT CODES

DRP2000 Double pivot swing arm **DRP2000*** Double pivot swing arm (custom)

SINGLE PIVOT SWING ARM

- Quick and easy assembly with slide on drape design.
- Requires only 8" of railing for attachment.
- Lightweight aluminium construction.
- Universal design fits both sides of the table.
- Creates a 26" wing of protection under the table.
- 28" long panels come standard, but can be customised to your needs.
- 0.5mm lead equivalency.
- 6 panel design for ease of use with a C-Arm.

PRODUCT CODES

ABOVE TABLE ATTACHMENT

- Compatible with double and single pivot models.
- 22"(W) x 9"(H) quick attach shield provides additional protection above the swing arm.
- 0.5mm lead equivalency.

PRODUCT CODES

DRP1000A Above table attachment **DRP1000A*** Above table attachment (custom)

PROPAD SCATTER SHIELDS

"The scattered radiation from the patient comprises the main source of radiation dose to staff" – International Atomic Energy Agency.

ProPad Scatter Shields are made from our Lead-Free material which effectively attenuates Compton scatter emitted from the patient during interventional procedures. ProPad's are designed to be placed on top of the patient drape during Interventional procedures to create a "scatter-free" zone. Providing a cost-effective way to significantly reduce operator exposure.

- Sterile, individually packaged & disposable
- Two styles to offer optimum protection
- Lead equivalency: 0.25mm
- Attenuation data: 91% at 90kV
- Dimensions: 42cm x 32cm
- Quantity: 5x shields per box.

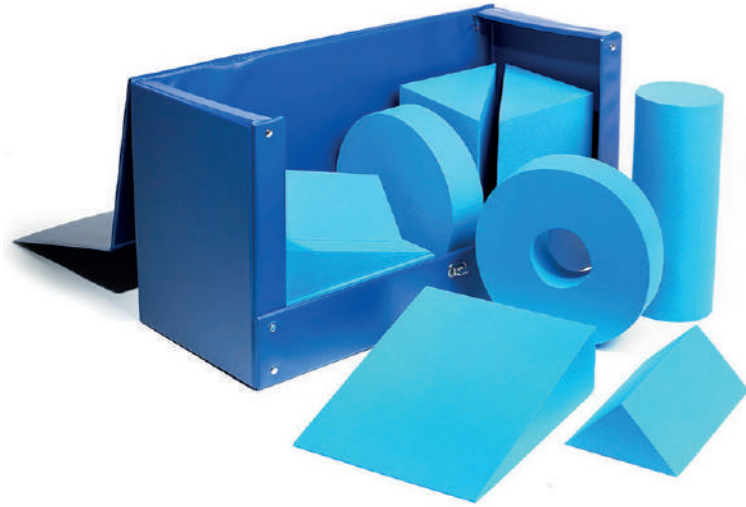

PRODUCT CODES

2923 Interventional shield **2934** Left subclavian shield

FOAM POSITIONING WEDGES

A selection of foam pads made from high quality radio-transparent polyester foam which has a polyurethane coating. These are dirt-resistant and easy to clean.

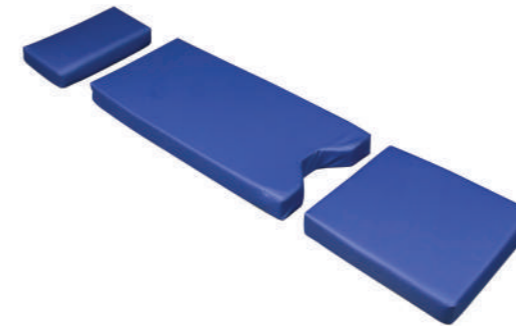

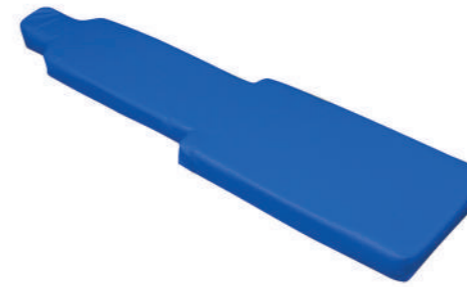

PRODUCT CODE
