

Wound Care Products

Professional wound care by evercare®

Self-adhesive non-woven rolls, non-sterile

Permeable adhesive dressings for low to moderately exuding wounds

Self-adhesive plaster rolls, non-sterile

Semipermeable adhesive dressings for low to moderately exuding wounds

Absorbent dressings for heavily discharging wounds

Sterile forceps

Sterile and non-sterile bandages

Self adhesive non woven rolls, non sterile

- Skin-friendly adhesive, stretchable and conforms well to body contours.
Allows movement when in place
- For fixation of dressings, swabs, catheters and cannulae
 - Gentle but secure fixation
 - Ideal for areas such as neck, elbow and knee
- Easy to remove release paper
- Breathable
- Moisture repellent

Self-adhesive fabric

Application

Transparent Comfort IV dressings, sterile

- **Comfort I.V. dressing, reinforced, sterile**
- **evercare® Comfort I.V. dressing, reinforced, sterile** is a dressing designed for cannula fixation. It provides optimal conditions for the I.V. site regarding skin's moisture level, very high breathability and 100% protection against dust, water and bacteria at the same time. The transparent foil material is reinforced with nonwoven material at one side to strengthen the fixation.
- **Key Features:**
 - Primary dressing for cannula fixation
 - Ultimate breathability, allows excess moisture to pass
 - Effective barrier to water and bacteria
 - High comfortability for the patient
 - Transparent PU foil with a nonwoven reinforced part
 - Coated with polyacrylic adhesive
 - Contain extra strips for enhanced securement over the I.V. site
 - Sterile dressings, sterilized by EO

SELEFA® Nonwoven sponges, are designed to feature excellent absorption for fluids and wound or abrasion's exudates.

Their high softness insures lenient covering and cleaning of wounds as the material is less adherent than gauze devices.

- High quality viscose/polyester nonwoven material
- **High softness and low linting**
- Less adherent to the wound than woven gauze devices
- Pre-treated with EtO gas
- Can be sterilized
- Available in sterile version
- Different size and shape range
- **Effective in liquid and exudate absorption**
- Wide area of use: pre-operative skin cleansing, wound cleansing, drying, absorption, protection etc.

Surgical tape Nonwoven is latex-free, breathable nonwoven tape. Thanks to excellent adhesive properties it adheres well to the skin. An economical, general purpose surgical tape.

- Key Features:
- Fixation medical tape made from thin nonwoven material
- In a white colour
- Strong adherence to the skin
- Perfect for fixation of tubes, cannulas, catheters and small medical equipment during surgical procedures
- For fixation of all kinds of dressings
- Suitable for sensitive skin

AGENCIES-WOUND CARE

Advanced
Wound
Care

FORYOU MEDICAL

for you, for us, for life

LUOFUCON® Silicone Foam Dressing is an absorbent, conformable foam dressing with a soft silicone contact layer.

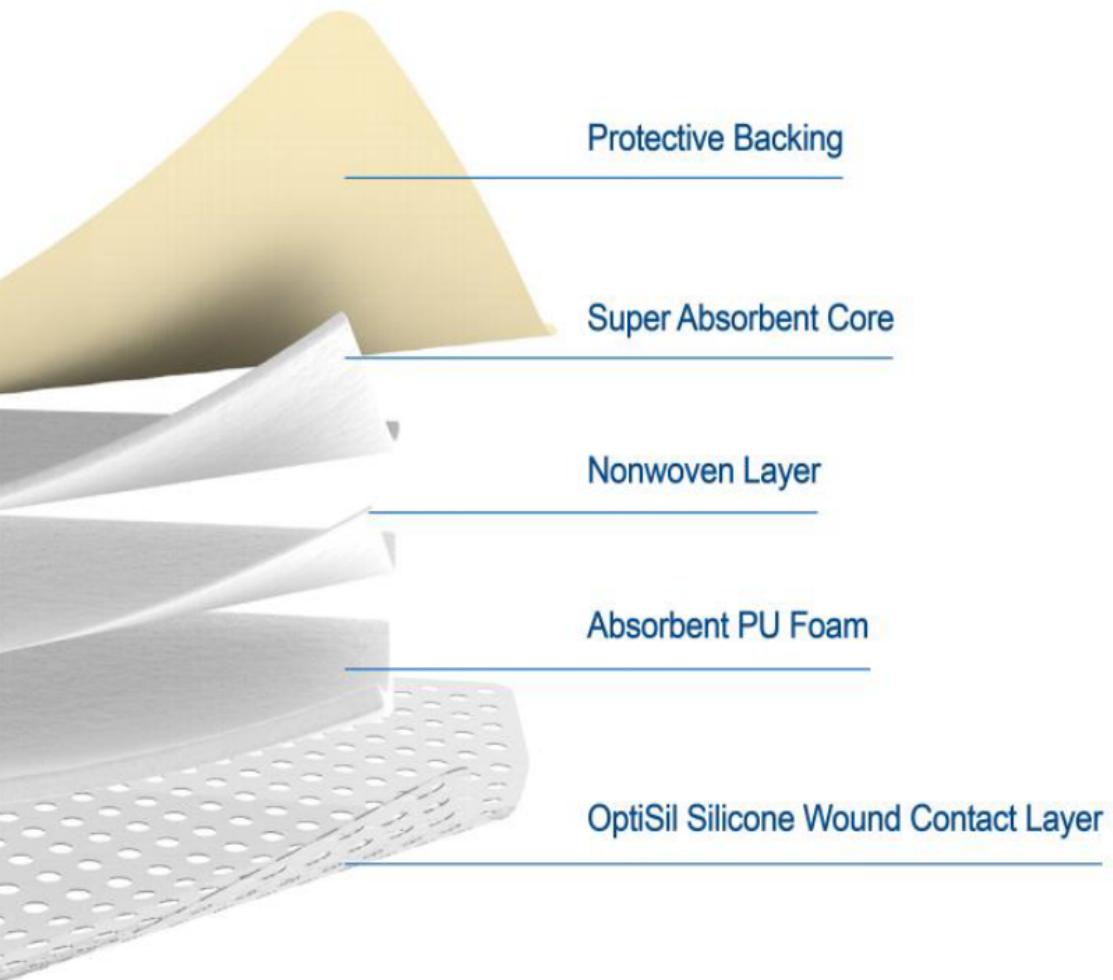

It is suitable for a wide range of exuding chronic and acute wounds.

Contains SAP / SAP

- Red Wound
- Yellow Wound
- Pink Wound
- Moisture Balance

Protective Backing

Super Absorbent Core

Nonwoven Layer

Absorbent PU Foam

OptiSil Silicone Wound Contact Layer

Highly MVTR and water-proof

Exceptional Absorption Capacity

Spread fluids to a wide surface

Comfort and cushioning

Gentle secure without stripping of epidermal cells

Highly versatile dressing for use on moderate-to-heavy exuding wounds

LUOFUCON® Foam Dressing, which is EO sterilized, is composed of soft and highly absorbent polyurethane, and is permeable to both gas and water vapor. It can bulkily absorb wound exudates and maintain moist environment, which accelerates wound healing. It is especially suitable for excessive exuding wounds.

Benefits

- Various in forms, shapes and sizes;
- Highly absorbent (more than 10 times of fluid);
- Transmitting moisture vapour and oxygen;
- Providing moist environment for wound healing;
- Occlusive for bacteria proof;
- Comfortable and conformable.

Absorptive & Protective

Sufficiently flexible and conformable to stay on wounds to provide cushioning effect against mechanical forces and a moist wound environment.

Indications

LUOFUCON® Foam Dressing is used for heavily exuding wounds, especially during the inflammatory phase following debridement and de-sloughing, when drainage is at its peak, including:

- Deep cavity wounds;
- Pressure ulcers;
- Leg ulcers;
- Donor sites;
- Lacerations and abrasions.

- Red Wound
- Yellow Wound
- Pink Wound
- M: Moisture Balance

Black Wound

Necrosis or tissue death due to insufficient blood supply, usually accompanied with dry scab, such as mummification necrosis in diabetic foot and scab in deep pressure ulcer surface.

Yellow Wound

An open wound with exudate produced by micro-organisms. A yellow color in the wound bed may be a film of fibrin on the tissue. Tissue that has recently died due to ischemia or infection may also be yellow.

Red Wound

The wound in granulation phase with healthy blood flow has the color of red. Also a clean wound or a wound that begins to heal becomes beefy red when granulation tissue covers the wound bed and thickens.

Pink Wound

A pink wound has tender epithelial tissue, which is in the epithelialization phase of wound healing.
