CAE Luna is available in three scalable patient configurations (Base, Live, Advanced), each perfectly constructed to help you make the right choice when selecting the options you need to develop the neonatal care skills that improve patient outcomes.
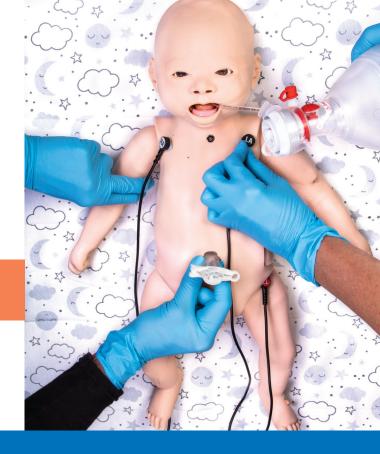

Featuring advanced and innovative CAE Healthcare technology, CAE Luna

- Realistically represents a baby from newborn status to 28 days post-delivery
- Easily converts from female to male
- Capably supports laryngospasm management
- Can be configured for Neonatal Abstinence Syndrome (NAS), pneumothorax, poor perfusion, and much more!

CAE Luna:
A true innovation in infant patient simulation

CAE Luna - Everything you've been waiting for in an infant simulator

Meet CAE Healthcare's first completely wireless and tetherless infant simulator.

Offering a comprehensive range of unique features and training options (pre-made tracheostomy site, peripheral arterial line placement, subclavian catheter placement, laryngospasm), CAE Luna provides learners with realistic practice in the most crucial aspects of infant healthcare while satisfying essential requirements for Infant Nursing Skills, Pediatric Advanced Life Support (PALS), and the Neonatal Resuscitation Program (NRP).
