

MONIDOR

Precise intravenous therapy for every patient

Monidrop® W

INFUSION MONITOR

Enables more precise intravenous therapy and helps nurses to improve patient safety

High quality

Small and accurate device

More precise IV therapy

In order to improve patient safety

User friendly

Easy to set up, train and service

Cost-saving

Suitable for standard IV administration sets that are up to 80 % lower price

IV ScreenTM

Better patient management and quicker response times

IV Screen will show the status of all the infusions on the hospital wards

Efficient

Saves nurses time as they are able to monitor all infusions remotely

Less alarms

Notifications are given remotely which is especially beneficial at night-time

IV ScreenTM

Overview screen shows

- Status of all infusions
- IV Screen shows remotely:
 - 1. Notification status (traffic light)
 - 2. Flow rate (ml/h)
 - 3. Volume (ml)
 - 4. Duration of treatment (hh:min)
 - 5. Battery status
 - 6. Target settings (if set)
