

## A PURE WATER SUPPLY FOR YOUR BATTERIES

**INTEGRATED  
DEIONIZER**

**60 LITRE  
CAPACITY**

**REAL-TIME  
FEEDBACK**

## PROBLEM

More often than not, a water supply is in a hard to reach position. What's more of an issue is that operators often use impure water to fill their batteries, causing a lot of issues such as:

- Increased self-discharge.
- Shortened run time.
- Reduced battery life.

The water used to fill batteries should be free from impurities as they can affect cell voltages and can't be removed by using conventional filters.

## SOLVED

The HydroFill Pro is a mobile watering system that solves all of these problems. Its integrated water deioniser makes pure water so that you can fill your batteries on the go. This helps to:

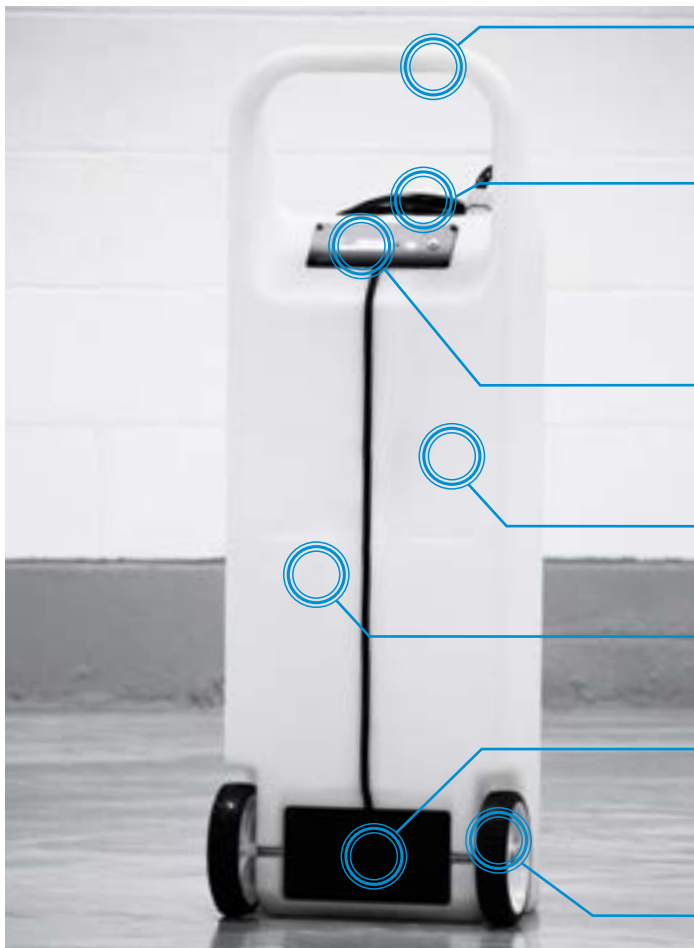

- Ensure batteries are filled easily.
- Increase battery life.
- Reduce frequent battery purchases.

As more real-time feedback is provided, your normal battery is turned into a smart battery with easy to understand information.

## SMART WATER

The HydroFill Pro brings a new set of features to our HydroFill range. It provides a 60 litre supply of pure water exactly where you need it most. The HydroFill Pro also has a tactile LCD feedback screen that gives you real-time information, greatly improving your battery watering capability. Our HydroPure Deioniser filling cartridge is integrated with the HydroFill Pro so you can make pure water from any water supply.

The LCD feedback screen lets you know the purity of the water as you are topping up your batteries, to make sure your water is always free of impurities. It also has a discharge indicator, a low water alert, and a diagnostics mode, giving a range of information. All of this data is available in multiple languages, making it internationally accessible.

**EASY TO MANOEUVRE**

**3-METER HOSE**

**LARGE LCD DISPLAY WITH  
REAL-TIME FEEDBACK**

**HUGE 60 LITRE CAPACITY TANK**

**OPTIONAL INTEGRATED DEIONISER**

**SEALED RECHARGEABLE BATTERY**

**HARD WEARING AND DURABLE DESIGN**

## SPECIFICATIONS

• Part Number:	<i>CRT-3</i>
• Maximum Capacity:	<i>60L</i>
• Height:	<i>1000mm</i>
• Width:	<i>350mm</i>
• Output Hose Length:	<i>3m</i>
• Water Pressure:	<i>14.5psi / 1 bar</i>
• Wheel Size:	<i>150mm</i>
• Shipping Weight:	<i>8kg</i>
• Max weight:	<i>72.7kg</i>
• Charger Part Number	<i>CRT -E202</i>
• Cartridge Part Number	<i>PS-600</i>

## FEATURES

- **INTEGRATED DEIONISER**
- **LCD FEEDBACK SCREEN**
- **60 LITRE TANK**
- **PURITY SENSOR**
- **DISCHARGE INDICATOR**

## BENEFITS

- **EASY TO USE**
- **ROBUST**
- **TRANSPORT WATER EASILY**
- **NO ASSEMBLY REQUIRED**
