What is Cross-sizing?
 Sizes that share the same color, share the same cup but have a different (i.e. wider or smaller) underbust width. So cross-sizing focuses on bra sizes with the same cup.

Examples:

- If a customer tries on EUR size 80D, and the cup fits well, but the underbust is too tight, then the customer fits 85C. This size has a wider underbust width, but the same cup as 80D.
- If a customer tries on EUR size 80D, and the underbust fits well, but the cup is too big, then the customer fits 80C.
- With 9 different cups, you can make the 1400-1 complete size range (ABCDE/F 70-90/85).
