Shop Service

Please order always with the exactly specification and a clearly indication if you mean rebate size, visible size or picture size. In principle we prefer rebate size.

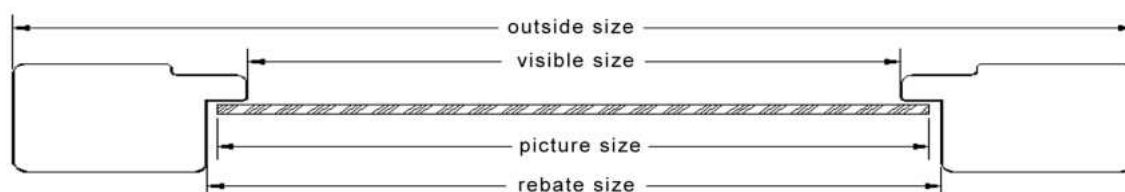

If you order picture size, we calculate the rebate size as we add 1mm on each side.

All chops and frames will be produced with this rebate size. For example, a picture size 40 x 60 cm follows a rebate size of 40,1 x 60,1cm.

In case you do not make a notice in your order, we consider all specifications as rebate size.

Due to technical reasons our chops have a tolerance from + 0 mm until + 2 mm.

Please take care of these conditions if you would like to arrange the allowance to the glass size by yourself.

Assembly instruction for security system

Important: The special key must be ordered separately.

Order-No.: 51713

Special key order-no.: 51714

> 01 Measurement and marking of the drilling distances 	> 02 Fastening the adjusting screws 	> 03 Alignment and securing by adjusting discs  Ready made frame and adjusting screws seen from behind
Mark the desired height of the picture frame. The drilling distances from the outer edges of the interchangeable frame are 80 mm. After hanging up the removable frame (see Fig. 03), mark the lower dimension (15 mm) from the lower edge of the frame and drill. (° 8 mm)	Fasten the hangers (adjusting discs) as shown.	Place the removable frame on the adjusting discs (2) as shown above. Place the special key (4) - between the wall and the removable frame - on the square of the adjustment discs and align the frame horizontally by turning the adjusting discs.

2_Oval-head screws	2 pieces	
3_Screw lock (hammer-head bolt)	1 piece	
4_Hexagon dowel	2 pieces	
5_Eight dowel	1 piece	
6_Special key	1 piece	

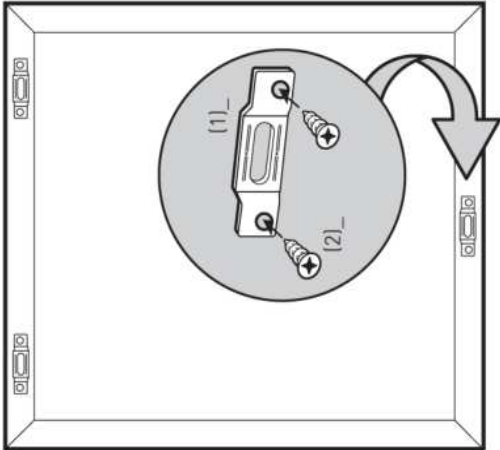

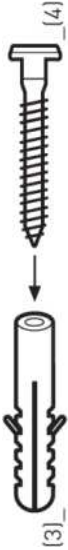

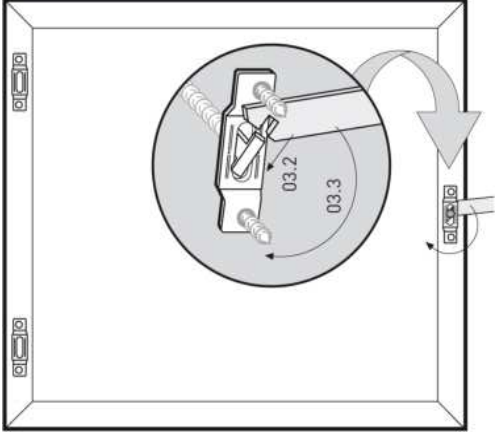

> Wood - Cut

Assembly instruction for security system

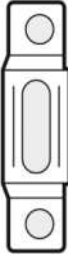

Important: The special key must be ordered separately.

Order-No.: 51705

Special key order-no.: 51714

> 01 Measurement and marking of the drilling distances 	> 02 Fastening the screw locking devices 	> 03 Alignment and securing by adjusting discs 
Screw the special fittings (1) onto the wooden frame as shown above using pan-head screws (2). Mark and drill the desired height of the picture frame (° 8 mm).	Insert the dowels (3) into the holes ° 8 mm. Screw the screw locks (4) into the dowels as far as they will go, that the outer surface of the screw locking devices up to the wall is approx. 5 mm. Bring the screw locking devices into horizontal position.	03.1 Put the picture frames with the special fittings on the horizontally screwed in screw locks (4). 03.2 Grasp into the screw neck with the special wrench (5) and 03.3 Move the screw locking devices into the vertical position. The frame is secured.

> Parts List

1_Special fittings  3 pieces	2_Oval-head screws  6 pieces	3_Dowels  3 pieces	4_Screw fuse  3 pieces	5_Special key  1 piece

Specifications

- 100% alpha cellulose buffered with 3% calcium carbonate
- ageing resistant according to DIN EN ISO 9706
- pH neutral (acid-free) - lignin-free
- surface papers are dyed with pigments - colour fastness
- core material made of MSK natural, through-dyed core remains permanently white or black
- clear assortment of strong selling colours (white - grey - black)
- available in the sizes 81x122 cm and 101x152 cm, thicknesses 1.5 mm and 2.2 mm
- efficient use - little waste - ideal for mass production
- small packaging units of 5 sheets per item

The innovative "Artcare System" for the optimal preservation of your frame quality.

With our Artcare Passepartouts you actively protect your pictures from aggressive environmental influences right from the beginning. No other passe-partout offers you this active protection; all other passe-partouts can only protect your pictures passively.

Artcare Quality against Pollutants

Light fastness in contrast to fading.

Manufactured with real pigments instead of simple colouring agents.

Moisture-resistant in contrast to colour bleeding.

In contrast to simple colouring agents, the real pigments in Alphamat Artcare absorb moisture. This guarantees colour fidelity and protection from bleeding.

Ageing resistance in contrast to yellowing.

Alphamat Artcare is alkaline-produced and equipped with protective buffer substances. Long-lasting acid protection and permanently white cut edges.

Pollutant filter in contrast to aggressive environmental influences.

Artcare products have a pollutant filtering effect due to the structure of the paper with its closely interlinked paper fibres. In the so-called "molecule traps" (= zeolites = microchamber technology) catch the pollutants before they damage the picture. Gases are bound before they react with acids. Free acids e.g. acetic acid from colours/dyes are absorbed and neutralised. This technology renders pollutants harmless - regardless whether they come in from outside or via the natural ageing of the picture.

All Alphamat and Alpharag Artcare passepartout and mounting boards fulfil and exceed the criteria of DIN 6738, ISO 9706, ANSI/NISO Z39.48-1992 (paper ageing resistance).

Backingboards - the backbone of professional picture framing

You don't see them, and yet they are an essential part of every picture framing: the back panel. It gives every picture the necessary "back support", supports and protects the complete and protects the entire framing and acts like a "backbone".

At such a crucial point, you should opt for reliable quality:

Foamboards and backingboards from nielsen.

Tested qualities for the different requirements of your customers.

You can choose between standard, museum and Artcare quality.

The Artcare quality also meets the highest conservation standard. The ultimate in conservation framing. Additional picture protection through Micro-Chamber technology. Maximum resistance to ageing, unsurpassed light fastness and optimal optimum protection against moisture.

The archival backingboards are ideal as a barrier board between the artwork and the backingboard, at the same time serve optimally as background cardboard.

Foamboard - lightweight foamboard Hard shell, light core: the Foamboard sandwich construction

All lightweight foamboards have one thing in common:

the core made of foamed polystyrene.

It is responsible for the high rigidity and the low weight. The top layer makes the surface on both sides pressure-resistant and even. Depending on the requirements, different materials are used for this purpose. All foamboards are CFC-free. Our foamboards are available in different versions.

This gives you the option of choosing between the **acid-free nielsen Foamboard** or the **Artcare Archival Foamboard** for demanding framings and the stable Standard Foamboard - a price-conscious alternative. In addition to the Craftboard - a sturdy two-colour light foamboard - self-adhesive Foamboards are available in different sizes.

Foamboards are particularly suitable for large-format framing due to their low weight and high strength and density are particularly suitable for large-format framing.

Foamboard acid-free

300198	nielsen Foamboard FandecK - 9 pieces	5,32 €

Advantages at a glance:

- Sandwich panel with cover layers, white or black on both sides
- Universally applicable, whether as a back panel or backing material for display, print and laminating purposes
- High density, strength
- Easy to process
- Homogeneous, smooth top layer
- Low weight
- Excellent flatness and high dimensional stability
- New formats, efficient in use - easy to handle

ClearColour UV92

A must for conservative framing

- optimum protection for the art object
- no fading of the colours and no yellowing of the paper by UV radiation, UV protection 92%
- less than 1% of light reflection and improved transmission for undisturbed artistic enjoyment
- perfect contour sharpness thanks to 6-fold interference optical antireflection coating
- White glass, both sides and fully usable
- colour fidelity of the framed object
- very smooth surface easy to clean
- scratch-resistant by an extra protective layer

TrueColour UV70

Natural and vivid colours

- maximum transparency
- brilliant colour reproduction of the framed object
- less than 1% of light reflection and improved transmission for undisturbed artistic enjoyment
- perfect contour sharpness thanks to 4-fold interference optical
- White glass, both sides and fully usable
- perfect for private use
- very smooth surface easy to clean
- scratch-resistant by an extra protective layer

ClearColour UV99

Not only for museums and galleries

- maximum protection for the art object through a UV blocker coating
- no fading of the colours and no yellowing of the paper by UV radiation, UV protection 99%
- less than 1% of light reflection and improved transmission
- Floatglass, fully usable
- no "orange peel effect" of the UV blocker coating
- very smooth surface easy to clean
- scratch-resistant by an extra protective layer

| General terms and conditions of business

1. Our quotations are non-binding in respect of price, quantity, material, delivery deadline and availability. Shipment shall be at the recipient's risk. Written order confirmations shall only be provided on special request.
2. Variations in shortfall, weight, colour and dimensions which are customary within the sector shall not constitute grounds for complaint. Errors and amendments excepted. Samples shall be non-binding.
3. Unless something has been agreed to the contrary in writing, our terms below shall be decisive in governing the extent and acceptance of orders. We reserve the right to send out consignments in return for cash on delivery and shall charge a handling fee of € 15,50 for this. These terms and conditions shall remain valid even if individual points within them are found to be ineffective in some way.
4. Promised delivery deadlines (ex works) shall be met wherever possible. Part deliveries with corresponding invoicing are allowed. Unforeseen events which are outside of our control shall extend the delivery deadline by an appropriate amount. Our right of withdrawal in the event of force majeure is not affected by this. If delivery deadlines are not met, the ordering party may only withdraw from the contract if an additional deadline period of 30 days which it has set in writing has passed without anything happening. In the event of withdrawal, the ordering party shall not have any entitlement to compensation.
5. Our invoices are payable within 30 days net without any deductions. If payment is made within 10 days of the date of the invoice, we shall grant a 2% discount for early payment. We generally deliver custom-made designs with payment in advance, taking account of the increased discount rate for early payment of 3%. The prices which are specified in the list are net prices excluding value-added tax. The prices which apply on the date of delivery are the prices which are invoiced. Shipment shall be at the recipient's risk, by the route which seems to us to be the cheapest, unless the purchaser prescribes something specific, irrespective of who is paying the freight charges. If we are paying the transport costs, we shall be at liberty to choose the transport carrier. The shipment costs which are listed in the valid price list relate exclusively to deliveries made to the address of the ordering party. In the case of different delivery addresses, we reserve the right to charge higher shipment costs. All orders are passed on to the shipping department as soon as they are received. Additional orders can therefore only be treated as new orders. We shall be responsible for choosing the type of packaging, exercising our best judgement. It is generally not possible to take
6. Any complaints must be notified to us in writing within 8 days of the goods being received. Any damages sustained during transport shall only be reimbursed if the damage acceptance notice of the respective transport carrier is presented. In the event of justified claims on account of defects, we shall only provide compensation up to the value of the goods to which the complaint relates, if necessary by providing a replacement delivery free of charge. The goods must be packaged in a correct and proper way. No liability is accepted for any consequential damages. We will not accept any return consignments which are sent back without a prior enquiry being made and without our consent.
7. The goods which are delivered shall remain our property until all of the outstanding bills arising from the existing business relationship have been paid in full. The retention of title shall remain in force if, after account balancing has taken place, it is identified that an outstanding balance remains. When cheques and bills of exchange are produced, payment shall only be deemed to have been received when they are cashed. If the goods are resold before payment is received, the proceeds earned from this or the claim which has arisen from the resale shall become our property. The purchaser may neither pledge nor assign for the sake of security to a third party the goods which are obtained under retention of title. In the event of judicial pledging by third parties, the purchaser must notify us immediately. If the purchaser stops its payments before payment has been made, we have the rights which are listed in § 46 of the German Bankruptcy Act to segregation of the goods or assignment of the rights in return for this. Goods which are demanded back by us shall be credited at the amount at which they can be sold on. The same shall apply if, following delivery, what we consider to be justified doubts arise regarding the purchaser's willingness to make payments.
8. The place of performance and place of jurisdiction is Rheda- Wiedenbrück. We shall also be entitled to institute legal proceedings at the relevant court for the registered office of the purchaser.
9. Terms of payment for all articles: 10 days 2% discount for early payment, 30 days net, Direct Debit 3%.

All prices are exclusive of statutory value-added tax.
Errors and amendments excepted.
