24/25 DREAM BOARDS- SKI

MERVIN  MADE
USA • ZERO HAZARDOUS WASTE

Jake Little by Tim Zimmerman

THE LIB TECH **experimental DREAMSCAPE...**

A state of the art, environmentally friendly, zero hazardous waste board building facility tucked away in the upper left corner of the United States, near Canada. We grew up on skis. Our SkiEO spent 25 years as a ski engineer, froths on all things Lib Ski and never misses a backcountry gate opening. We started building "Narrow Ass" Dream boards for our beloved Mt Baker surfer/skier friend Tory Bland aka "cozy pants" and we are still chasing ski dreams today. This year we have new shapes on Anthony's backcountry Wundersticks. A new Hemi 102 resort minded freerider that is sure to be a favorite between storms. Gianna and some of the Lib ladies have been dreaming of a wider more backcountry focused freeride ski so we added the Lib Stick 103 to make sure the crew are grinning ear to ear.

MAGNE-TRACTION® EFFORTLESS EDGEHOLD

SERRATED STEAK KNIFE TECHNOLOGY TURNS ICE INTO POWDER!

Pioneered by Lib Tech, our patented Magne-Traction® serrated edge technology increases edge hold power and makes our skis feel 10mm narrower on hardpack allowing you to push your skiing to new levels. Magne-Traction® reduces fatigue, builds confidence and makes skiing easier. For Lucas, you and the crew that means high performance, more fun and no limits progression.

MAGNE-TRACTION JIB ADVANTAGE:

Detune your skis for metal, plastic and cement and still get great edge hold all over the mountain.

FREESTYLE EVERYWHERE. The perfect one ski quiver, this is our crews' good time stick. Rips pow lines in the morning, destroys natural freestyle terrain features all afternoon and loves a pow hike closer. We worked with legendary artist Ben Lardy on this space themed apparition. Longer tip and tail rocker zones make this freestyle contour the ideal ski for hardpack and creative park inspired freestyle. The square tip and tails jib as well as they float... everywhere is a happy place on this dream' daily driver.
