

Manual: Fly Trap Meadow

Create a fly-free zone in 3 steps

1. Mix the EcoWeide Attractant (6 x 40g bags) with 6 liter warm water in the bucket.
2. Place the bucket outside in approx. 10-15 meter distance to the fly infected area.
3. Place the bucket approx. 1.5 high at a sunny and warm place out of the horses' reach.

Locate the bucket

- Place the bucket outside in the fly infested area
- Fill the bucket with EcoWeide attractant and warm water

Control water level

- Vaporization: refill water
- No flies in the bucket: place the bucket at a new location

Full bucket

- After approx. 6-8 weeks: empty contents of the bucket and refill with EcoWeide attractant and warm water
- Optional: Filter out the flies and refill water

End of season

- Clean the bucket and store in a dry place.
