

Fitting guide 4H-TECH S-Shift for Corsa A / Nova

There is a small bent in one side of the top shift bar. This bent must be on transmission side of the car. (left side)

Adjustment:

Remove black plastic plug from gearbox. Stick drill of 5mm into the hole and turn to lock.

Keep the gear lever in the neutral position against the left side and keep it in this position. (Line of the first and second gear). Ask someone to keep the lever in this position and tighten the bolt.
