Important compatibility information

Hard production-date limit: up to 03/2010. From after March 2010, MINI changed the physical selector system. The 4H-TECH GS6/2A-Shift does not fit that later system.

BMW/MINI parts catalogues may show OEM 23007602720 as a later replacement or supersession for shift units used on vehicles produced after 03/2010. Such later catalogue compatibility must not be interpreted as 4H-TECH GS6/2A-Shift compatibility.

The applications above are therefore restricted to the original pre-change R55, R56 and R57 manual-transmission vehicles. R58, R59, R60 and R61 are not included.

If your MINI was produced around the 03/2010 changeover, please email your VIN (chassis number) to **4h-tech@short-shifters.com**. You may also send us a clear picture of the original gear selector mechanism located on top of the gearbox.
