

ELECTROLYTE BOOSTER

For maximum endurance and rehydration.

Electrolyte Booster is a supplement for maximum endurance and rehydration based on electrolytes.

NUTRIENTS	UNIT
Crude protein	10,45 %
Crude fat	0,33 %
Crude fibre	0,03 %
Crude ash	33,48 %
Calcium	3,53 %
Phosphorous	0,82 %
Magnesium	0,14 %
Sodium	7,3 %
Kalium	0,0 %
Chlorid	0,0 %

Instructions

To be fed at 50 g / 100kg BW per day.
Ideally to be fed together with concentrate.

Dietary feed to compensate for electrolyte loss during heavy sweating. Mix 50 g (3 scoops) for feed shortly before and as soon as possible after exercise or sweating. Recommended duration of use: 1-3 days. Drinking water should be available at all times. If insufficient water intake is observed, veterinary advice should be sought. The even use of different organic acids or their salts is contraindicated when one or more of them or mab at the maximum level applied. Use only for target animals.

Composition

Dextrose, Sodium chloride, Vital Wheat Gluten, Sodium bicarbonate, Anhydrous Magnesium Sulphate, Glycerol Tributyrat.

Low in sugars
and starches
