

SPORT FIBER

Fibre-rich sports mix

Lannoo Sport Fiber is a varied sports mix containing alfalfa fibre, specifically formulated to develop muscle volume without the risk of muscle acidification. This mixture contains easily digestible proteins and is rich in essential amino acids to boost optimal muscle development. Moreover, the low sugar and starch content prevents stomach and muscle overload, making this muesli suitable for all horses.

The added alfalfa fibre ensures optimal transit and better absorption of the feed. To provide sufficient energy over a long period of time, Lannoo Sport Fiber contains an increased fat content, which enables optimal performance.
