

Food Waste Disposer: IMC 523

Construction

IMC 523 is a compact and space saving solution for direct mounting under sink. Well suited for small and medium size kitchens.

Equipment / features:

- Wall mounted IP65 control box
- Manual water control with sink taps
- Rubber petals at sink opening.
- Rubber housing to minimize noise.
- Automatic thermal overload to protect motor.
- Manually reversible motor for extended operational life.
- Supplied with fitting for 89 mm (3,5 ") sink opening.

Use

IMC Food Waste Disposers offer excellent throughput and performance at low operating cost with a high degree of operator safety.

A long-life motor combined with special alloy grinding elements enable a variety of soft food waste, including plate scrapings and vegetable peelings to be disposed of quickly and safely.

Voltages:

230V single phase 50 or 60Hz

230/400/440V 3-phase

Options:

500 series food waste disposers are also available for weld into table and as free standing unit

See separate leaflet

Capacity:

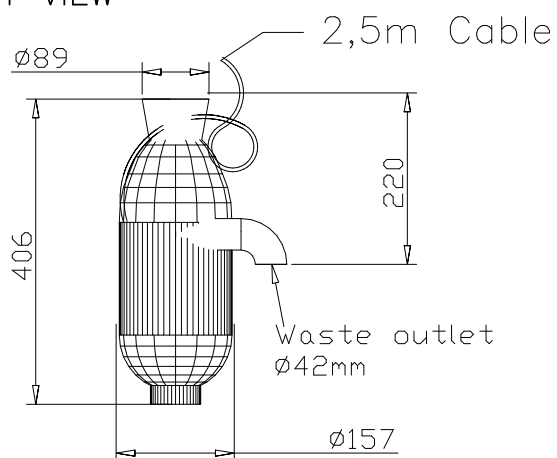

100 kg/hour or 200 covers pr. sitting

- EASY CLEANING
- ENERGY EFFICIENT
- SAFE OPERATION
- COMPACT DESIGN
- RECYCLABLE

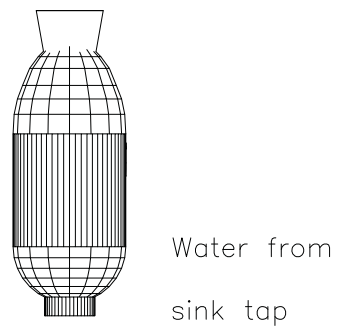

Voltage	Rated Power	Current	Weight
230/1/60	0,55kW	2,6A	18kg
