

## UPGRADING COROLLA 4A INTO TOYOTA-27

### Background

COROLLA 4A supports 4A proximity key programming.

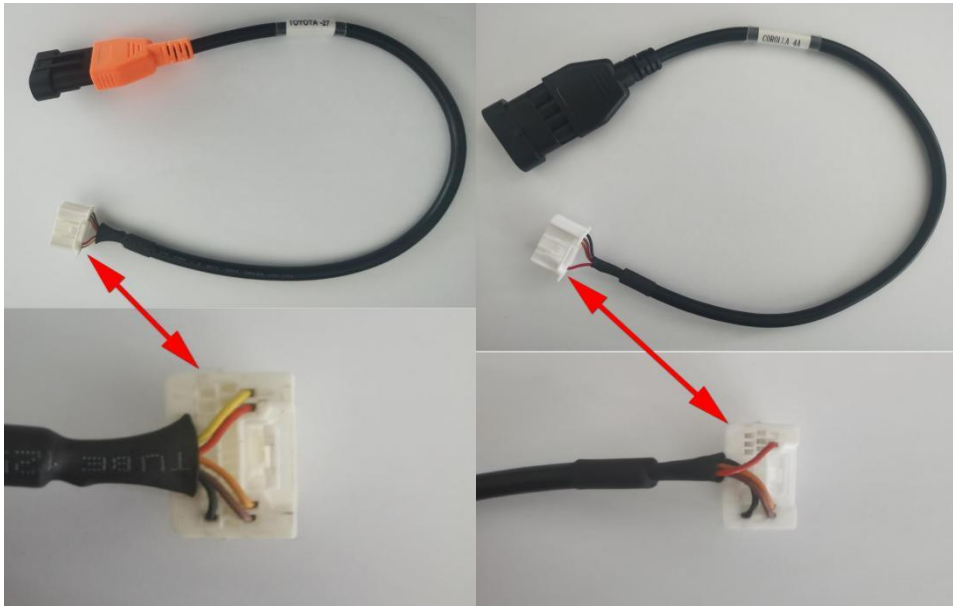

TOYOTA-27 supports 4A, 8A-A9, 8A-AA...proximity key programming.

TOYOTA-27, replaced COROLLA 4A in CAN DIRECT KIT, is the upgraded version of COROLLA 4A.

Comparing with COROLLA 4A, TOYOTA-27 has one more power cable.(Pls refer to pics below )

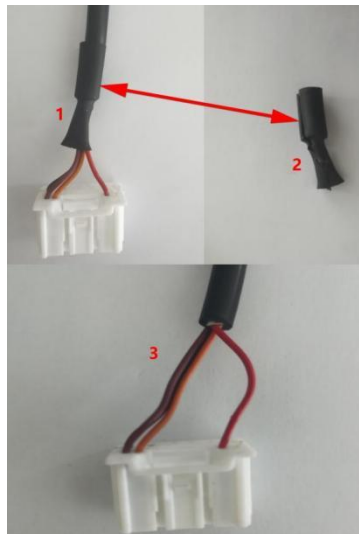

Pic 1(TOYOTA-27)

Pic 2(COROLLA 4A)

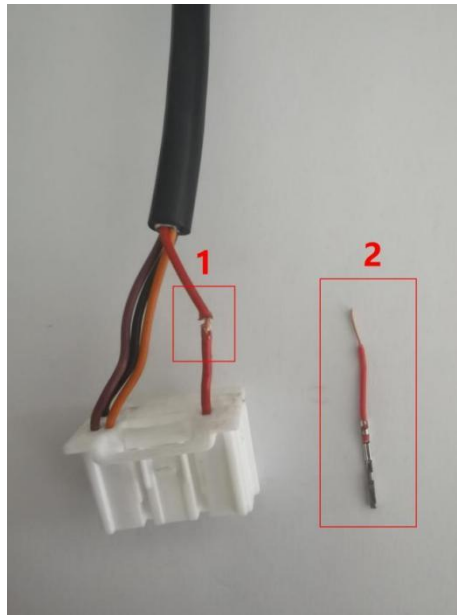

### Instructions for upgrading COROLLA 4A into TOYOTA-27

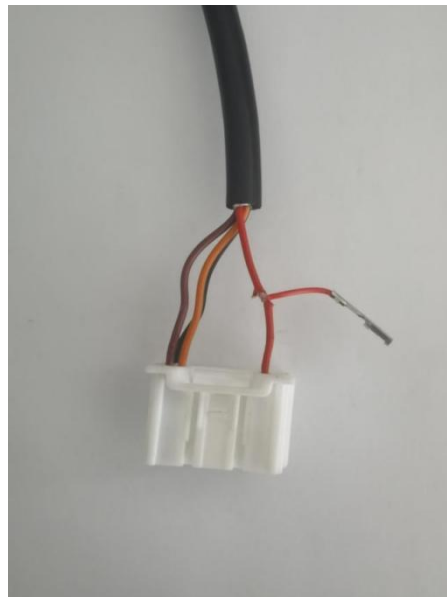

1.Remove the heat shrink tube part as pic below from COROLLA 4A

2. Break the insulation of the red wire harness (power wire) and find matched DuPont line (female).

3. Connect the DuPont line (female) to the point of the red wire harness (power cable) as pic below.

4.Insert the DuPont cable into the No. 4 hole as pic below and protect it with insulating tape to avoid short circuit.
