Chronic & Caviar

Chronic & Caviar is a Dutch cannabis seed company specializing in American cannabis genetics. Cannabis genetics such as Gelato #33, Zkittlez, Bruce Banner, Do-Si-Dos, GMO Cookies, Wedding Crasher, Gorilla Glue are some of the strains in our collection.

Our seeds are the product of mainly Californian growers. Working with them, we went on a hunt for the most popular exotic cannabis hybrids. The United States has started a significant advance in the cannabis world. This also means that more and more American species are making the crossing to Europe. Many European seed banks cross the most popular American genetics with their own European genetics. We only offer the original American genetics. We want to make sure that the original genetics are not lost through the many crossings.

Since there is a huge variety of cannabis seeds on the market, as well as online seed banks, making the right choice can often be overwhelming. View our specifications by type to find out which type is most suitable for you. If you are still in doubt, please do not hesitate to contact us.
