Start With  
Green

Welcome to Greenmoods B.V., a wholesale company that specializes in high-quality artificial plants and flowers. Founded out of a passion for interior design, we believe that artificial plants and flowers are the latest fashion trend. Our mission is to provide our clients with the highest quality artificial plants and flowers that are both beautiful and affordable.

Since our establishment in 2020, we have been committed to our own import line, and have built up an extensive inventory that reflects the latest trends in interior design. With 15 years of experience, we have built a reputation as a trusted supplier of artificial plants and flowers.

Located in Rotterdam, our large warehouse enables us to maintain a diverse inventory of artificial plants and flowers that is ready for quick delivery. We provide our clients with prompt delivery services throughout Europe, and pride ourselves on our commitment to customer satisfaction.

At Greenmoods B.V., we are dedicated to providing our clients with the latest and most innovative products, and our inventory is constantly updated to reflect the newest trends in interior design. We believe that artificial plants and flowers are an essential component of any interior design, and are proud to offer our clients the highest quality products at affordable prices.

# Why choose for artificial plants?

**For years**, artificial plants were seen as a cheap and tacky alternative to the real thing. However, times have changed, and now many people are turning to artificial plants as a stylish and practical alternative to living plants.

Perhaps the most significant advantage of artificial plants is that they require very little maintenance. Unlike living plants, which need watering, pruning, and sometimes fertilizing, artificial plants require none of these things. Living plants can trigger allergies in some people, particularly those with asthma or hay fever. Artificial plants don't produce pollen, so they won't cause these problems

While high-quality artificial plants can be expensive upfront, they can save you money in the long run. Unlike living plants, which need to be replaced periodically, artificial plants can last for years without needing to be replaced
