OPAQUE SYSTEM FOR INTERIOR FURNITURE:

PRIMER

17-0556 \ Ankocryl Interior Filling Primer

A high quality filling primer for MDF with nice flow and excellent sanding properties. This product can be applied using all types of equipment including conventional gravity fed pot guns (larger nozzle sizes 2.5mm and above), HVLP apparatus and air assisted airless pumps. A thick coat can be applied to fill the MDF depending on the quality of the MDF. The product sands very nicely to provide a very smooth finish for subsequent topcoats. It can be tinted to a range of colours going as dark as a mid-grey such as RAL7037 to make top coating with darker colours an easier process. Can be forced dried by a range of techniques including catalytic IR. May also be applied by curtain coating.

TOPCOATS

17-0865 \ Ankocryl Interior Opaque Topcoat

A quick drying and hard wearing interior opaque topcoat giving an exceptional smooth finish for interior use such as kitchen cabinets and bedroom furniture. Can be applied using conventional gravity fed pot and HVLP apparatus. Superb flow to afford a very smooth pleasing finish with scratch and abrasion resistant qualities.

11-0030 \ Ankolux Aqua PU

Waterborne semi-gloss intermediate and finishing coat for brush application onto interior timber surfaces especially suited for interior trim and furniture as long as the furniture is not subject to heavy abrasion.

TRANSPARENT INTERIOR PRODUCTS:

SPRAY APPLIED TRANSPARENT INTERIOR LACQUERS

Ankocryl Interior Clear lacquers \ 17-0870, 17-0873 and 17-0878.

This range of hard wearing and highly scratch resistance lacquers give a pleasing range of sheen levels and are ideal for all interior furniture uses. They can be applied using conventional gravity fed pot guns, HVLP apparatus and air assisted airless pumps. As with all the Anker Stuy interior primers and finishes they have excellent flow and levelling giving a very classy smooth appearance. They have high clarity and are non-yellow. The higher sheen versions maybe used as a finish to alter the sheen of the opaque finish if required. Gloss levels and codes are shown below.

17-0870 \ Ankocryl Interior Clear Lacquer Nature Matt

This product leaves a natural finish without any gloss. A wooden staircase or furniture will therefore retain its natural appearance.

17-0873 \ Ankocryl Interior Clear Lacquer Satin

17-0878 \ Ankocryl Interior Clear Lacquer Gloss

This product has a 70% gloss level.

Reference case:

Westminster Abbey.
The chairs have been treated with our Ankocryl Interior Satin Finish over a specially designed stain colour.

SYSTEM FOR OPAQUE FINISH ON MDF:

2 x 17-0556 Ankocryl Interior Filling Primer
