

House of Classics

Windsor Bathrooms & Kitchens®

Established 1903

Step into timeless elegance

A classic bathroom is more than a design. It is an experience.

Each space is thoughtfully composed, with an eye for detail and materials selected to withstand years of intensive use— without ever compromising on elegance.

From distinctive private interiors to internationally inspired design environments, every concept is designed to enhance the identity of its surroundings.

Timeless forms, high-quality materials, and perfectly balanced proportions create an atmosphere that feels both familiar and subtly impressive.

In environments where daily use meets high expectations, classic design reveals its true value. Each project begins with a vision, carefully translated into a refined interior concept where aesthetics and functionality come together in perfect harmony.

A structured approach and reliable delivery provide clarity and confidence at every stage, from the initial concept through to the final realization.

- Specialized in classic bathroom concepts
- Designed for intensive use
- Consistent quality and long-term availability
- Timeless design, free from trends

Classic SHOWERSETS

Create a luxurious experience with a high-quality shower set crafted from durable brass.

The generous 20 cm rainfall shower head and hand shower provide ultimate comfort, with the option of a version with or without dual control. The dual control version allows independent adjustment of water flow and temperature, and easy switching between the rainfall shower and hand shower.

Available with a concealed or exposed thermostatic valve, and in a refined selection of finishes: chrome, nickel, brushed nickel, polished brass, and brushed brass. Other finishes available upon request.

Durable, stylish, and functional—an investment in a bathroom experience that leaves a lasting impression.

Nickel

Almost all of our faucets are equipped with high-quality internal components from the German company FlühS, the world's leading specialist in this field. Thanks to their exceptionally precise manufacturing, the faucets always open and close smoothly, allowing the water flow to be adjusted with ease.
