

Folding instructions

- Use a solid and flat surface to fold / assemble
- Place mailbox with outside on surface and inside facing upward
- Before assembling the box, you should firmly prefold each folding line (the red lines in the image). Pre-fold the fold lines towards the inside

How to assemble the box

1. fold up the lower and upper parts (No. 1 and No. 2) in their entirety
2. Hold up these sections and fold up the sections on the sides (No.4 and No.5). The corners (no.1) should fold inwards when doing this
3. fold the No. 5 parts inwards over the No. 1 corners
4. Push the last parts (No 6 and No 7). These fold (green lines drawing) in opposite directions as a result. Push nr. 6 against the bottom. No. 7 fits into the recesses of No. 2 (No. 8). These serve as locks to prevent the box and lid from slipping off.
