DESCRIPTION

Spectrum r-PETG is an environmentally-friendly 3D printing material that fits into a sustainability initiative. The filament is created by reusing the recycled extrusion residual waste stream. The raw material is collected, shredded, re-mixed and homogenised into a high-grade and easy-to-print recycled PETG filament with much less environmental impact. Spectrum r-PETG retains the properties of classic PETG.

FEAUTURES

- · manufactured from recycled materials
- lower environmental impact by reusing waste
- · environmentally-friendly, cardboard spool
- · easy printing, similar to standard PETG
- · no shrinkage after cooling

STORAGE AND SHELF LIFE

Filament should be stored in a dry room at room temperature. Recommended storage temperature is ca. 18-25°C (64.4-77.0°F). Keep out of moisture, sunlight and direct heat. When stored properly, product has a shelf life of 24 months.
