**Subject:** Verification Thermofloc

Dear sir / madam,

I hereby confirm that, following detailed examination as independent 3<sup>rd</sup> party verifier, I have not been able to trace any relevant deviations in the LCA and by its project report from the requirements outlined in the corresponding product category regulations based on EN 15804+A2. The LCA is executed in accordance with the NMD-Assessment Method 1.1 PCR. The company-specific data have been examined as regards plausibility and consistency; the declaration owner is responsible for its factual integrity.

The verification has been performed for the following reports:

- LCA Thermofloc

Authored by Zoë Tan from Hedgehog Company.

Based on the verified LCA in question, HedgeHog Company composed an environmental profile. No MRPI-certificates were issued.

The environmental profiles are linearly scalable, by thickness of the wall space. The results (ECI-score) of the base scenario is presented in annex A.

Pieter Stadhouders MSc is registered on behalf of EcoReview at NMD (Foundation for the Dutch National Environmental Database) as an Accredited LCA expert. He is hereby authorized by NMD to perform this verification. Results of the LCA are a self-declaration by the producer and therefore remain under the responsibility of the producer.

Sincerely,

Pieter Stadhouders MSc

## Annex A: Results (ECI Score)
