

BATTERY-POWERED VACUUM LIFTER

- Below-the-hook vacuum lifter suitable to be used with all stationary and mobile lifting systems.
- Lifts up to 300 kg with the load in horizontal position and 150 kg in vertical position.
- Interchangeable batteries for multiple shifts and internal buffer battery.
- No external power supply required.
- **Vacuum pump specifically manufactured for Mivac suction cups, ensuring vacuum generation and gripping speed in just a few moments.**
- **Logic board designed according to Mivac specifications, allowing automatic vacuum regeneration in the event of micro-leaks, ensuring continuous grip and maximum safety during handling operations.**
- Quick-change suction cup system.
- Ideal for both sales and rental applications.
- Compact, ergonomic and lightweight design.

MAX. HORIZONTAL LIFTING
CAPACITY (variable according to the
type of suction cup)

300 KG

MAX. VERTICAL LIFTING CAPACITY
(variable according to the type of
suction cup)

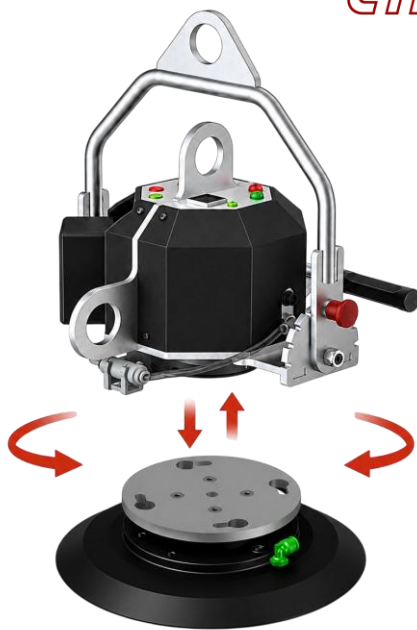

150 KG

MAXIMUM WEIGHT
(variable according to the type of
suction cup)

18 KG

Mivac is a brand of

Liftagon capacities with integrated standard suction cups

	Horizontal lifting capacity	Vertical lifting capacity	Ø suction cup	Total weight
Liftagon + suction cup VAC110	110 kg	55 kg	250 mm	14 kg
Liftagon + suction cup VAC170	170 kg	85 kg	300 mm	16 kg
Liftagon + suction cup VAC230	230 kg	115 kg	350 mm	17,5 kg
Liftagon + suction cup VAC300	300 kg	150 kg	400 mm	18 kg

Important

The values indicated refer exclusively to standard rubber suction cups suitable for use on smooth, clean and dry surfaces, at 60% vacuum.

Liftagon can be configured with custom-designed plates and suction cups for specific applications.

Customizations can involve both the geometry of the gripping system and the suction cup material, allowing adaptation even to porous, irregular or delicate surfaces.

A flexible and highly customizable solution for handling different loads safely and effectively.
