The Complete Line of
Soft Cloth PAP Masks

SleepWeaver®

Why choose soft cloth instead of hard plastic?

Because Soft is Better!

Soft cloth vs. hard plastic:

The choice is obvious. SleepWeaver is the world's first line of all-cloth Positive Airway Pressure (PAP) masks. Hard plastic masks don't seal very well, and they're uncomfortable. They can cause pressure sores. They're noisy. They trap heat and moisture. They're rigid, and make it hard to change your sleeping position.

Circadiance soft cloth technology is different:

- Soft cloth is as comfortable as your favorite pajamas.
- Cloth moves with you, so you can sleep more naturally.
- Cloth conforms and seals perfectly to your face for more effective air delivery.
- Cloth wicks away moisture to let your skin breathe.
- Unlike latex or silicone, cloth is non-allergenic.
- No buckles, clips, or faceplates touching and irritating the skin.
- No more noisy air blowing into your bed partner's face.
- Easy to clean and maintain!

Designed by CPAP users for CPAP users like you.

We designed the SleepWeaver line of products because we know Soft is Better. Our customers tell us they'll never go back to hard plastic again—and their doctors are happy that they actually comply with their CPAP therapy after trying soft cloth.

Circadiance Soft Cloth Technology:

Our products eliminate the five most common complaints about hard plastic masks: air leakage, pressure from headgear, limited sleep positions, skin irritation, and noise.

- **Reduced Air Leakage:**

Cloth masks inflate to form a balloon of air that conforms perfectly to your face to form a seal.

- **Reduced Pressure from Headgear:**

Our headgear requires very little tension. The air pressure inside the mask keeps the mask in place, which eliminates pressure sores.

- **More Sleep Positions:**

Sleep on your side, back, or stomach without rigid buckles, clips, or faceplates digging into your skin.

- **No More Skin Irritation:**

Cloth is non-allergenic, smooth, and breathable, never sticky or tacky. Nothing enters the nose—no more irritated mucosal tissues!

- **Less Noise:**

Our small exhalation holes eliminate “whooshing” or “whistling,” and mask design minimizes air turbulence.

Soft Cloth PAP Masks

Advance

Nasal PAP Mask

**One
Size
Fits
Most**

SleepWeaver Advance
