Bambu Lab P1 Series A Leap in 3D Printing

The Bambu Lab P1S caters to a wide range of printing needs, from simple prototypes to complex, multi-material models, making it a great choice for both beginners and experienced users looking for a high-performance 3D printer.

Endless Possibilities

- **16 Multi Color**
- **Bambu enclosure**
- **Enhanced monitoring**
- **20 m/s² Acceleration**

01 Higher-Temp Filament Printing

The P1S is designed with an enclosed body, making it suitable for printing with high-temperature filaments. This enclosure helps maintain a consistent environment that is crucial for materials that require stable higher temperatures.

02 Advanced Motion Control

The printer features a CoreXY motion system capable of reaching up to 20,000 mm/s² acceleration, allowing it to execute prints at high speeds without sacrificing quality.

03 Multi-Color Printing

With the addition of the AMS (Automatic Material System), the P1S can handle up to 16-color printing (when using 4 AMS systems).

04 Built-In Monitoring Capabilities

The P1S includes a built-in camera for remote monitoring and creating timelapse videos of your prints. Allowing you to keep an eye on the printing process from anywhere.

Unleash Your Creativity

Unlock the full potential of 3D printing with the Bambu Lab P1S. Whether you're tackling complex multi-material projects or high-temperature prints, the P1S delivers with its rapid CoreXY system and multi-color AMS capabilities.

Enhance your printing experience with advanced monitoring and ease of use straight out of the box. Don't wait to transform your creative ideas into reality—explore the possibilities with the P1S today!
