# **BAMBOO IS THE LARGEST MEMBER OF THE GRASS FAMILY**

---

**THE GROWTH OF BAMBOO IS VERY FAST – THE SPECIES  
THAT WE USE FOR FURNITURE GROW MORE THAN ONE  
METER WITHIN 24 HOURS! BAMBOO RE-PLANTS ITSELF.  
NEW BAMBOO SHOOTS WILL SPREAD FROM THE ROOTS.**

Bamboo releases more oxygen than any other plants, actually 35% more than ordinary woods. This is due to the fast growth. Bamboo also recycles large amounts of CO<sub>2</sub>. Bamboo can absorb 30% CO<sub>2</sub> and release more than 35% oxygen, so choosing bamboo as material means contributing positively to CO<sub>2</sub> evolution. In addition to being, a very fast-growing plant, bamboo is a very strong and hard material and stronger than traditional woods. Bamboo is very stable and is affected only very little by humidity.

**BAMBOO CARE** The bamboo lamellas on HOUE tables are treated with a special impregnation from the factory, which is drawn into the bamboo. To keep the table nice, it is necessary to treat the bamboo lamellas on a regularly base with oil suitable for bamboo. We recommend you to, oil the table before taking it into use, and again after approx. 4 weeks, then as needed (3 – 4 times a year).
