TOOLPRO

powered by **ghibli & wirbel**

TOOL PRO: THE COMPLETE PROFESSIONAL VACUUM CLEANER RANGE DESIGNED BY GHIBLI & WIRBEL IN ORDER TO ANSWER TO MANUFACTURERS AND ARTISANS NEEDS. IT REPRESENTS THE IDEAL SOLUTION FOR A NON STOP WORKING, THANKS TO THE INNOVATIVE SHOCKING VALVE SYSTEM!

TOOLPRO

powered by **ghibli & wirbel**

Complete range of vacuum cleaners, equipped with powerful and high efficiency new generation motors, specifically designed for use in conjunction with electric or pneumatic tools, in order to optimize the work of installers, craftsmen, manufacturers. Equipped with the **FD (Fine Dust) filtration system**: three stages (paper filter bag, textile filter and cartridge filter in teflon PTFE, M filtration class) that guarantee best filtration performances and higher motor protection. **SHOCKING VALVE**: the semiautomatic filter cleaning system that assures an extreme duration of the filter and stops clogging, saturation and reduction of filtering capacity. Different models with power from 1250 W to 1450 W and tank capacity from 22 to 50 liters, manual or automatic ON/OFF (controlled by the tool).

THREE FILTRATION STAGES

CARTRIDGE FILTER

M filtration class always installed.

In teflon PTFE:

- no dust accumulation on its sides for a fast and simple cleaning;
- high humidity resistant and washable (longer duration than standard filters).

TEXTILE FILTER

with a filtering capacity up to 0,35 m², that guarantees best suction performances and maximum motor protection.

PAPER FILTER BAG WITH CAP

to work safely, without disperse dust in the environment. Up to 19 l of capacity.

SHOCKING VALVE: REVERSE FLOW FILTER CLEANING

THE HIGH EFFICIENCY CARTRIDGE FILTER (M CLASS) CAN BE EASILY CLEANED, IN A SEMIAUTOMATIC WAY, THANKS TO THE SHOCKING VALVE.

The "SHOCKING VALVE" lateral flap, with push and pull system, allows to handle the air flows in a practical and safe way.

Pushing (or pulling) some times the lateral flap and closing the suction intake at the same time, it is possible to get an immediate filter cleaning, thanks to the differential pressure generated. This simple operation guarantees the maximum filtration capacity and best vacuum cleaner performance.

EL: TOOL PRO VACUUM CLEANERS WITH POWER OUTLET FOR ELECTRIC TOOL

Models with 22, 36 and 50 liter tank capacity equipped with a power outlet for electric tool, manual or automatic ON/OFF (controlled by the tool). It is possible to connect the electric tool directly to the vacuum cleaner (thanks to the power outlet) and to the suction intake, in order to collect dust and debris generated during work.

POWER TOOL PRO FD 22 P EL

TYPE	REF. NO.
POWER TOOL PRO FD 22 P EL	15671710001

TECHNICAL DATA		
Max power rating	W	1250
Container capacity	l	22
Air flow rate	l/s	71
Vacuum	mbar	235

Flexible hose for electric tool

Power outlet for electric tool

Textile filter

Shocking valve

Paper filter bag

Floating system and filter cage

POWER TOOL PRO FD 36 P EL

TYPE	REF. NO.
POWER TOOL PRO FD 36 P EL	15711710001

TECHNICAL DATA		
Max power rating	W	1250
Container capacity	l	36
Air flow rate	l/s	71
Vacuum	mbar	235

Flexible hose for electric tool

Power outlet for electric tool

Shocking valve

Floating system and filter cage

Textile filter

Paper filter bag

POWER TOOL PRO FD 36 I EL

TYPE	REF. NO.
POWER TOOL PRO FD 36 I EL	15755410001

TECHNICAL DATA		
Max power rating	W	1250
Container capacity	l	36
Air flow rate	l/s	71
Vacuum	mbar	235

Bayonet hose connection

Front swivel castor wheels

Reverse air flow

Floating system

Large diameter rear wheels and accessories holder

Textile filter

POWER TOOL PRO FD 50 P EL

TYPE	REF. NO.
POWER TOOL PRO FD 50 P EL	15791710001

TECHNICAL DATA		
Max power rating	W	1450
Container capacity	l	50
Air flow rate	l/s	74
Vacuum	mbar	260

Intake

Paper filter bag with cap

Flexible hose for electric tool

High efficiency cartridge filter (M class)

Textile filter

Switch board

Power outlet for electric tool

Shocking valve

Floating system and filter cage

COMBI: TOOL PRO VACUUM CLEANERS WITH POWER OUTLET FOR ELECTRIC AND PNEUMATIC TOOL

Models with 36 and 50 liter tank capacity equipped with a power outlet for electric and pneumatic tool, manual or automatic ON/OFF (controlled by the tool). It is possible to connect the electric or pneumatic tool directly to the vacuum cleaner (thanks to the power outlet or the pneumatic connection) and to the suction intake, in order to collect dust and debris generated during work.
