

FAST-GRIND® DISCS

PRODUCT DESCRIPTION

FAST-GRIND® DISCS are superior diamond tools with three or five resin bond segments. The tools are glued on spacers, which are glued to a circuit board to provide stability. The circuit board is glued to a nonwoven pad for optimal flexibility.

These discs are specifically designed to polish concrete floors with a power trowel machine with the FAST-GRIND® system.

RECOMMENDED USE

FAST-GRIND® BROWN 50g WET: to remove curing and tire tracks

FAST-GRIND® BLACK 100g WET: to remove curing and tire tracks

FAST-GRIND® BLUE 200g WET: creates a matt look

FAST-GRIND® RED 400g WET: creates a semi gloss look

FAST-GRIND® WHITE 800 DRY & WET: creates a gloss look

CLEANING & STORAGE

After using the FAST-GRIND® DISCS, clean them with water and store them in a dry place.

ALL PRODUCTS

FAST-FRAME

REVOLUTIONARY DRIVE BOARD SYSTEM with free floating discs that can be mounted on any power trowel machine.

FAST-GRIND® PADS

SUPERIOR POLISHING PADS with an open structure, based on microscopic crystal.

FAST-CLEAN

SUPREME CLEANING PRODUCT that pulls out contamination and stains.

FAST-STRIP

CHEMICAL AGENT designed to remove curing, tire marks, acrylic coatings, waxes, paint, oil and grease stains.

FAST-DENSIFY Lithium

WATER-BASED CONCENTRATED LITHIUM SILICATE that hardens, densifies and dust-proofs concrete floors.

FAST-DENSIFY Sodium

WATER-BASED CONCENTRATED SODIUM SILICATE that densifies, hardens and dust-proofs concrete floors.

FAST-PROTECT

STAIN REPELLENT that resists oil and waterborne stains, water-based and eco-friendly.

FAST-PROTECT+

LEADING STAIN REPELLENT that provides maximum protection against oil and waterborne stains on concrete and terrazzo.

6 mm segments

3 mm spacer

Circuit board plate

25 mm non-woven pad

BETTER-FASTER-STRONGER

ABOUT FAST-GRIND

WHAT IS IT?

FAST-GRIND® is a revolutionary solution for the polishing of concrete floors with a power trowel machine. It's the fastest, easiest and most efficient way to grind and polish large concrete floors.

The patented FAST-GRIND® coupling system makes it possible to equip each power trowel machine with diamond tools for polishing concrete floors. The combination of the latest diamond technology and the flexible planetary mounted drives provides the best results, guaranteed for the lowest cost per sqm.

With the FAST-GRIND® system different levels of finish can be achieved, from a basic finish to a "salt & pepper" high gloss finish.

HOW IT WORKS

The FAST-GRIND® system consists of a connector and a stainless steel frame with free-rotating discs. The connector is welded to the floating pan and falls into the frame.

The frame can thus easily be removed from under the machine to quickly switch diamond tools. On the frame 3 to 5 flexible driver plates are mounted so that 100% contact with the floor is guaranteed. Because the discs are free-rotating they spin around when they are under higher pressure at a certain point which ensures the long life of the diamond tools.

BENEFITS OF THE SYSTEM

The revolutionary FAST-GRIND® Technology

offers many benefits:

- + Polished concrete floors are 100% dust-free and easy to maintain.
- + Exceptional results with a high working speed.
- + Up to more than 1000m² polishing and finishing a day.
- + low investment, fits under any power trowel.
- + Very flexible system for 100% floor contact. Easy to assemble.
- + Very strong system and minimal cost per sqm.
- + Exceptional tool life
- + The most sustainable and ecological solution for floors.

MOUNT THE FAST-FRAME TO YOUR POWER TROWEL MACHINE IN 4 EASY STEPS:

**1. PLACE THE FRAME
ON THE FLOOR**

**2. SLIDE THE FRAME
UNDER THE MACHINE**

**3. ALIGN THE FRAME
WITH THE CONNECTOR**

**4. DROP THE MACHINE
INTO THE FRAME**
