

MANUAL BROWTYCOON BROWSHAPER

The procedure solves the problem with the brow hair growing in different directions and gives the desired shape to the eyebrows.

STEP 1

Remove makeup and make sure you clean the eyebrows, comb them well and make sure they are dry before starting the process

STEP 2

In case there are strong brow hairs growing in the wrong direction, use browtycoon browshaper Adhesive to ensure that the hairs are in the desired direction. Apply as little glue as possible on the brows hairs and comb them in the right direction using a brush.

STEP 3

Once the brow hairs are all in the desired direction, apply browtycoon browshaper FAST lotion to the brows with lint-free applicator, hold for 5 minutes.

STEP 4

Remove the product with a clean Lint-free applicator in the direction of hair growth. Do not use water. (Lint-free applicators are non-reusable!)

STEP 5

Apply Browtycoon Fast Fixer on the brows with clean lint-free applicator and hold for 7 minutes.

STEP 6

If you would like to color during lamination process, apply brow color mix to the brows (1:1 Brow Color + Fixer) hold brow color mix on for at least 5 minutes, we prefer tinting after the treatment because when you apply color in mix its possible the color became very dark.

STEP 7

Remove with clean Lint-free applicator and cotton pad soaked in lukewarm water.

STEP 8

Apply Browtycoon Shaper CARE to entire brow from root to tip by using a lint free applicator. and brush the brows. It helps to ensure perfectly sculpted eyebrows, and closed the hair (it's a vitamine bomb for your brows)

WARNING: * In case of contact with eyes, rinse immediately with plenty of water. Keep out of the reach of children.

** Keep track on time, it is very important.

*** May cause allergic reaction. Please test product on the skin before on hand to prevent allergic reaction.

FOR PROFESSIONAL USE!
