NAVIGATOR TXB EVOLUTION

The evolution of the diagnosis, designed and developed specifically for the marine environment.

The characteristics of the hardware make it compatible with all currently existing protocols, its integrated 16-pole CPC connector, allows the use of all diagnostic cables. It is compatible with AXONE NEMO and PC. Thanks to Bluetooth technology, the technician can make a comfortable diagnosis without wires, even from the jetty.
Extremely powerful, they allow the mechanic to easily manage the map files. The CAN standards supported include the possibility of CAN single wire management and a further CAN controller for the diagnosis of more networks.
It allows the recording of the diagnosis session in “dynamic tests” mode, that is to say with the boat in motion, to locate specific faults that could not be verified in the mooring. The interface reconstructs a complete panorama of the situation in which the anomaly has been verified, providing important elements of analysis to identify the causes of the failure.

NAVIGATOR TXB EVOLUTION

La evolución de la diagnosis, diseñado y desarrollado especificamente para el ambiente Marino.

Las características del hardware lo compatibilizan con todos los protocolos actualmente existentes, su conector CPC de 16 polos integrados, permite el uso de todos los cables de diagnosis. Es compatible con AXONE NEMO y PC. Gracias a la tecnología Bluetooth el técnico podrá realizar una cómoda diagnosis sin cables de por medio, incluso desde el pantalán.
Extremadamente potente, permite al mecánico una gestión fácil de los archivos de mapa. Los estandares CAN soportados incluyen la posibilidad de gestión CAN single wire y un CAN controller más para la diagnosis sobre más redes.
Permite la grabación de la sesión de diagnosis en modalidad “pruebas dinámicas”, es decir con la embarcación en movimiento, para localizar averías específicas que no se podrían verificar en el amarre. La interfaz reconstruye una panorámica completa de la situación en la que la anomalía se ha verificado, proporcionando importantes elementos de análisis para identificar las causas de la avería.

NAVIGATOR TXB EVOLUTION

L’evoluzione della diagnosi, disegnato e sviluppato specificamente per l’ambiente Marino.

Le caratteristiche hardware lo rendono compatibile con tutti i protocolli attualmente esistenti, il suo connettore CPC 16 poli integrato consente l’utilizzo di tutti i cavi diagnostici. E’ compatibile con AXONE NEMO e PC. Grazie alla tecnología Bluetooth il tecnico potrá realizzare una diagnosi senza cavi in mezzo, anche dal molo.
Estremamente potente, permette al meccanico una gestione facile degli archivi della mappa. Gli standard CAN supportati offrono la possibilità di gestire: CAN single wire e un altro CAN controller per eseguire le diagnosi su più reti.
Permette la registrazione di una sessione di diagnosi in modalità “prova dinamica”, ovvero con l’imbarcazione in movimiento, per constatare avarie specifiche che non si possono verificare in officina. La sua interfaccia permette di ricostruire una panoramica completa della situazione in cui l’anomalia si è verificata, fornendo gli elementi per identificare le eventuali avarie.

Il giogo terminale di giunzione a giunto U (39385A1) ha utilizzato i modelli on-line in linea.

USO DE MODELOS ANTIGUOS DE COLAS EN MODELSO MERCRUISER IR-IMR
USE OF OLDER MODEL STERN DRIVE UNITS ON MERCRUISER IR-IMR MODELS
UTILIZZO DI MODELLI OLDER PIEDE SUI MODELLI IR-IMR MERCRUISER

Mercury Marine no recomienda el uso de colas de modelos antiguos en modelos IR-IMR, ya que estas unidades no se acoplarán satisfactoriamente con el ensamblaje del transom. Además, las unidades en serie del modelo anterior, están equipadas con una horquilla de acoplamiento de unión en U (39385A1). Este eje es más corto que el (59830A1) usado en las unidades de impulsión de popa IR-IMR, y por lo tanto no acoplará completamente las estrías del motor. El uso del modelo más antiguo en un modelo de IR-IMR llevará al fallo de spline para acoplar al eje.
Mercury Marine does not recommended the use of older model stern drive units on IR-IMR models, as these units will not mate up satisfactorily with the transom assembly. Inaddition, the older model in-line stern drive units are equipped with U-joint coupling end yoke (39385A1). This yoke is shorter than yoke (59830A1) used on the IR-IMR stern drive units, and therefore will not fully engage the engine coupler splines. Use of an older in-line model stern drive unit on a IR-IMR model will result in a spline failure to coupling an/or yoke.
Mercury Marine non ha raccomandato l'uso Mercury Marine non ha raccomandato l'uso di unità di trasmissione a poppa più vecchie su modelli IR-IMR, in quanto queste unità non si addicono in modo soddisfacente con l'assemblaggio del trampolo. In aggiunta, le unità di comando a poppa in linea in versione anteriore sono dotate di giogo terminale di giunzione a U (39385A1). Questo giogo è più corto del giogo (59830A1) usato sulle unità di azionamento a poppa IR-IMR e pertanto non impegna completamente le spline di accoppiatore del motore. L'uso di un'unità anteriore di tipo a poppa modello in linea su un modello IR-IMR provocherà un errore di spline per accoppiare un / o giogo.

SHERWOOD da tres sugerencias sencillas para instalar un impulsor nuevo:

1 Use un lubricante con base NO derivada del petróleo (por ejemplo, silicona o agua jabonosa) para instalar el impulsor de una forma más sencilla.
2 Instale el impulsor en el eje con un movimiento rotatorio. Nunca fuerce el impulsor sobre el eje. Debe moverse libremente sobre el eje para un cebado y funcionamiento adecuados.
3 Aplique una pequeña cantidad de lubricante con base NO derivada del petróleo para fijar el aro tórico en su sitio y coloque la tapa.

SHERWOOD recomienda inspeccionar detenidamente el impulsor al realizar el mantenimiento de la bomba. Reemplace el impulsor si observa lo siguiente: desgarro o rotura en alguna de las palas del impulsor. Flexione las palas para poder examinarlas mejor.

EL RECALENTAMIENTO ES LA CAUSA PRINCIPAL DEL DESGASTE PREMATURO DEL MOTOR. PARA MANTENER EL BUEN RENDIMIENTO DEL MOTOR, NO DUDE EN ADQUIRIR LOS IMPULSORES SHERWOOD ORIGINALES.

Sherwood suggests three easy tips to help you install your new impeller:

1 Use a Non-petroleum based lubricant (i.e. silicone or soapy water) to help slide the impeller.
2 Install the impeller with a twisting motion onto the shaft. Never force the impeller onto the shaft. The impeller must move freely on the shaft to properly prime and function.
3 Use a small amount of Non-petroleum based lubricant to help hold the o-ring when replacing the cover.

SHERWOOD recommends inspecting your impeller closely during any pump maintenance. Replace the impeller if you discover either of the following: tear or rip on any of the impeller blades. Flex the blades to examine more thoroughly.

THE 1 REASON FOR PREMATURE ENGINE WEAR IS OVERHEATING. TO MAINTAIN ENGINE PERFORMANCE, INSIST UPON GENUINE SHERWOOD IMPELLERS

SHERWOOD consiglia tre semplici accorgimenti per l'installazione di una girante nuova:

1 Utilizzare un lubrificante con una base che Non derivi dal petrolio (per esempio silicone, o acqua insaponata).
2 Montare la girante con un movimento rotatorio, tenendo conto che essa deve muoversi liberamente per un corretto funzionamento. Non spingere mai la girante sopra l'asse.
3 Applicare una piccola quantità di lubrificate, posizionare l'anello di tenuta nella posizione corretta, quimdi, procedere a montare il coperchio.

SHERWOOD racomanda ispezionare attentamente la girante, e si osserva il seguente: strappatura o rottura di una o più pale, provedere a sostituirla.

IL RISCALDAMENTO È LA CAUSA PRINCIPALE DEL CONSUMO DEL MOTORE. PER MANTERE UN BUON RENDIMENTO DEL MOTORE NON DUBITARE AD ACQUISTARE LE GIRANTI SHERWOOD ORIGINALI

Todas las reparaciones las efectuará a su cargo el vendedor/distribuidor incluyendo la mano de obra aplicable según la Política de Mano de Obra detallada más adelante. **ES IMPRESCINDIBLE LA AUTORIZACIÓN DE RECAMBIOS MARINOS ANTES DE COMENZAR ALGUNA REPARACIÓN EN GARANTÍA**. Puede contactar con Recambios Marinos para conseguir el número de autorización. Las reparaciones o reemplazos de motor no alargan la validez de esta Garantía Limitada.

TRANSFERIBLE

Esta garantía es transferible y no está limitada al último comprador/propietario en el momento de la venta.

MANO DE OBRA

Recambios Marinos pagará la mano de obra sólo en reparaciones efectuadas en establecimientos autorizados. Recambios Marinos no se hace responsable de pagar mando de obra en reparaciones efectuadas por terceros que no estén certificados como mecánicos navales (Certificado de titulación correspondiente). En ningún caso, el total que se abonará por mano de obra superará los 400€ para barcos de hasta 20 pies, ó 470€ para barcos cabinados de 21 pies o superiores.

OBLIGACIONES DEL COMPRADOR

Pasadas 10 horas de la puesta en marcha del motor, el último comprador/propietario debe asegurarse de que un establecimiento autorizado y cualificado revisa el motor. Esta revisión debe incluir como mínimo: el ajuste de levas (si procede), ajuste de válvulas, ajustes del distribuidor y carburador, reapriete de los tornillos (First

Mate Marine recomienda reapretarlos independientemente del tipo de junta), cambiar el aceite y el filtro de aceite.

Vigile cuidadosamente los niveles de aceite durante las 100 primeras horas de funcionamiento ya que el consumo de aceite podría ser superior durante este periodo. Utilice aceite de motor de calidad con el grado y viscosidad apropiados y que recomienda el fabricante de los motores originales. First Mate Marine recomienda no utilizar aceites sintéticos o no detergentes el uso de los cuales anularía totalmente esta garantía. Una adecuada presión de aceite y lubricación son obligatorias para el buen funcionamiento del motor. Todas las embarcaciones deben estar equipadas con relojes o luces que indiquen la temperatura y presión de aceite del motor. **NO HAGA FUNCIONAR EL MOTOR EN CASO DE DETECTAR UNA PRESIÓN DE ACEITE O TEMPERATURA DEL AGUA INADECUADAS.**

Después de poner el motor en marcha, evite RPM excesivas y mantenga el barco planeando. Adapte las RPM durante las 3 a 5 primeras horas de funcionamiento. Unas RPM demasiado elevadas pueden dañar el motor causando fricción y recalentamiento. Evite largos periodos al ralentí. El calentamiento y fallo del motor debido a falta de lubrificación se puede prevenir si se monitoriza a través de los relojes y de las luces de aviso. La negligencia del comprador no puede en ningún caso ser el motivo de los daños ocasionados al motor.

LIMITACIONES Y EXCLUSIONES

Cualquier otra garantía (incluyendo las que haya extendido el vendedor o que se hayan extendido para un propósito particular), quedan excluídas y ninguna de ellas variará la validez o condiciones de esta garantía facilitada por Recambios Marinos. No se podrán reclamar otros gastos (directos o indirectos) como pérdida de beneficios, ventas perdidas, daños a otra persona o propiedad, remolque del barco, aceites, lubricantes, filtros, anticongelantes, juntas, gastos de envío, etc.

GLI OBBLIGHI DELL'ACQUIRENTE

Monitorare attentamente i livelli dell'olio durante le prime 100 ore di funzionamento, il consumo di olio potrebbe essere maggiore in questo periodo. Usare un olio di qualità con il giusto grado di viscosità e raccomandato dal costruttore del motore originale. First Mate Marine consiglia di non utilizzare oli o detergenti sintetici l'uso dei quali annullará totalmente questa garanzia. Un'adeguata pressione dell'olio e la lubrificazione sono obbligatori per il corretto funzionamento del motore. Tutte le imbarcazioni devono essere dotate di orologi o spie che indicano la temperatura motore e pressione dell'olio. **NON FAR GIRARE IL MOTORE IN CASO DI RILEVAMENTO DI UNA INSUFFICIENTE PRESSIONE OLIO O DI UNA TEMPERATURA ACQUA INADEGUATA.**

Dopo l'avviamento del motore, evitare accellerare a elevati numeri di giri e lasciare l'imbarcazione planeare. Adattare il REGIME durante la 3 a 5 ore di funzionamento. Accellerare a GIRI troppo elevati può causare danni e surriscaldamento al motore e conseguente attrito. Evitare lunghi periodi al minimo. Il surriscaldamento e il guasto del motore a causa della mancanza di lubrificazione può essere evitata se viene monitorato attraverso gli orologi e le spie. La negligenza da parte dell'acquirente per i danni causati al motore annulla automaticamente la garanzia.
