SPECS \& INFORMATION

## Bridge Clamps

These clamps can be manufactured with one or two bridges and for left-hand or right-hand helixes.
The Double Bridge clamp was developed by the Mikalor R\&D Department due to requirements from the ventilation sector and also for applications involving fume, woodchip and dust extraction for a clamp suitable for spiral hose incorporating an outer helix.

Bridge clamps are marked with
the application range, material, country of manufacture and the Mikalor logo in compliance with the DIN 3017 norm.

## Bridge Clamp ASFA L (9 mm)

ASFA L Bridge Clamps with 9 mm bandwidth and manufactured with one or two bridges are an ideal solution for hoses with an outer helix. The geometry and design of the bridges ensure a leaktight fit. These clamps are specially recommended for use on medium-sized and large bore hose mainly used for ventilation or extraction.

* The maximum application pressure can vary depending on the type of hose used and the geometry of the coupling.

| Application Ø | Material qualities |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| mm |  | Number of bridges | Bridge Position | $\begin{gathered} \mathrm{S} \\ +0,10 \end{gathered}$ | $h$ max. | $\begin{gathered} a+0,3 \\ a-0,2 \end{gathered}$ | b max. | Maximum values |  | Box Quantity (MOQ) |
|  |  |  |  |  |  |  |  | Torque ( Nm ) | Pressure (Bars) |  |
| 25-40 | (w1) W2 (3) (4) W5 | 1 | right/left | 0,7 | 10 | 9 | 14 | 4 | 30 | 100 |
