NORMA Face Shield

Safe. Comfortable. Cost efficient.

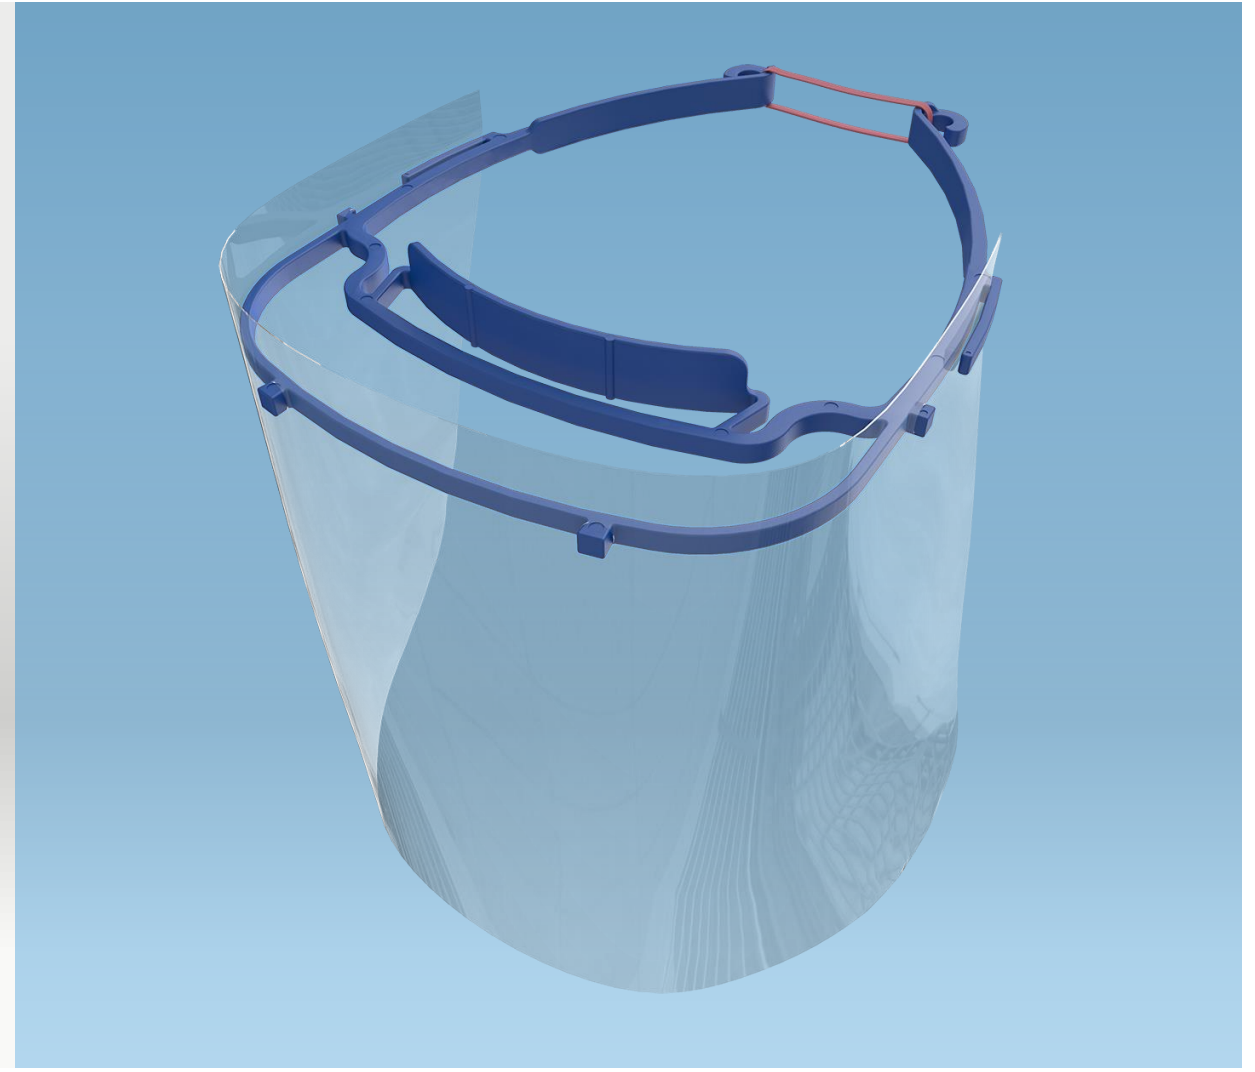

NORMA FACE SHIELD

Our contribution for safety in your day-to-day work

- + Developed in cooperation with the University Hospital Frankfurt
- + Improved design in terms of functionality and comfort
- + Large quantities available on short delivery times thanks to injection moulding
- + Made in Germany
- + Very good price/performance ratio

LARGER AREA COVERED

compared to many conventional versions

LARGER AREA COVERED

- + Extra large visor (larger than the standard with A4), specially cut from polycarbonate
- + Visor extends almost to the side of the ears
- + Extended visor length
- + Rounded design, no sharp corners
- + Foil sits on the outside of the frame and protects it from contamination

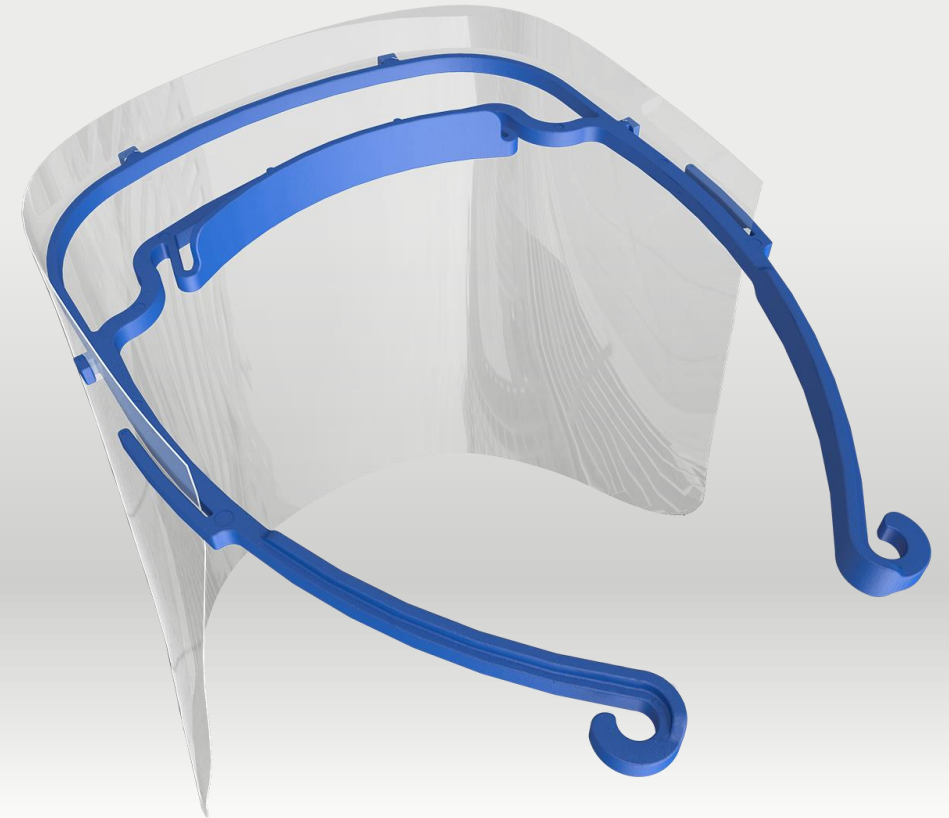

INCREASED COMFORT

compared to many conventional versions

INCREASED COMFORT

- + Very light material
- + Comfortable to wear with FFP2 mask and (protective) glasses due to increased distance between foil and face
- + Better ventilation due to open construction of the frame towards the top
- + Large contact surfaces at the temples avoid pressure points for extended wear
- + Polycarbonate visor for best possible vision
- + Ergonomic cut ensures maximum freedom of movement

EFFICIENT SOLUTION

compared to many conventional versions

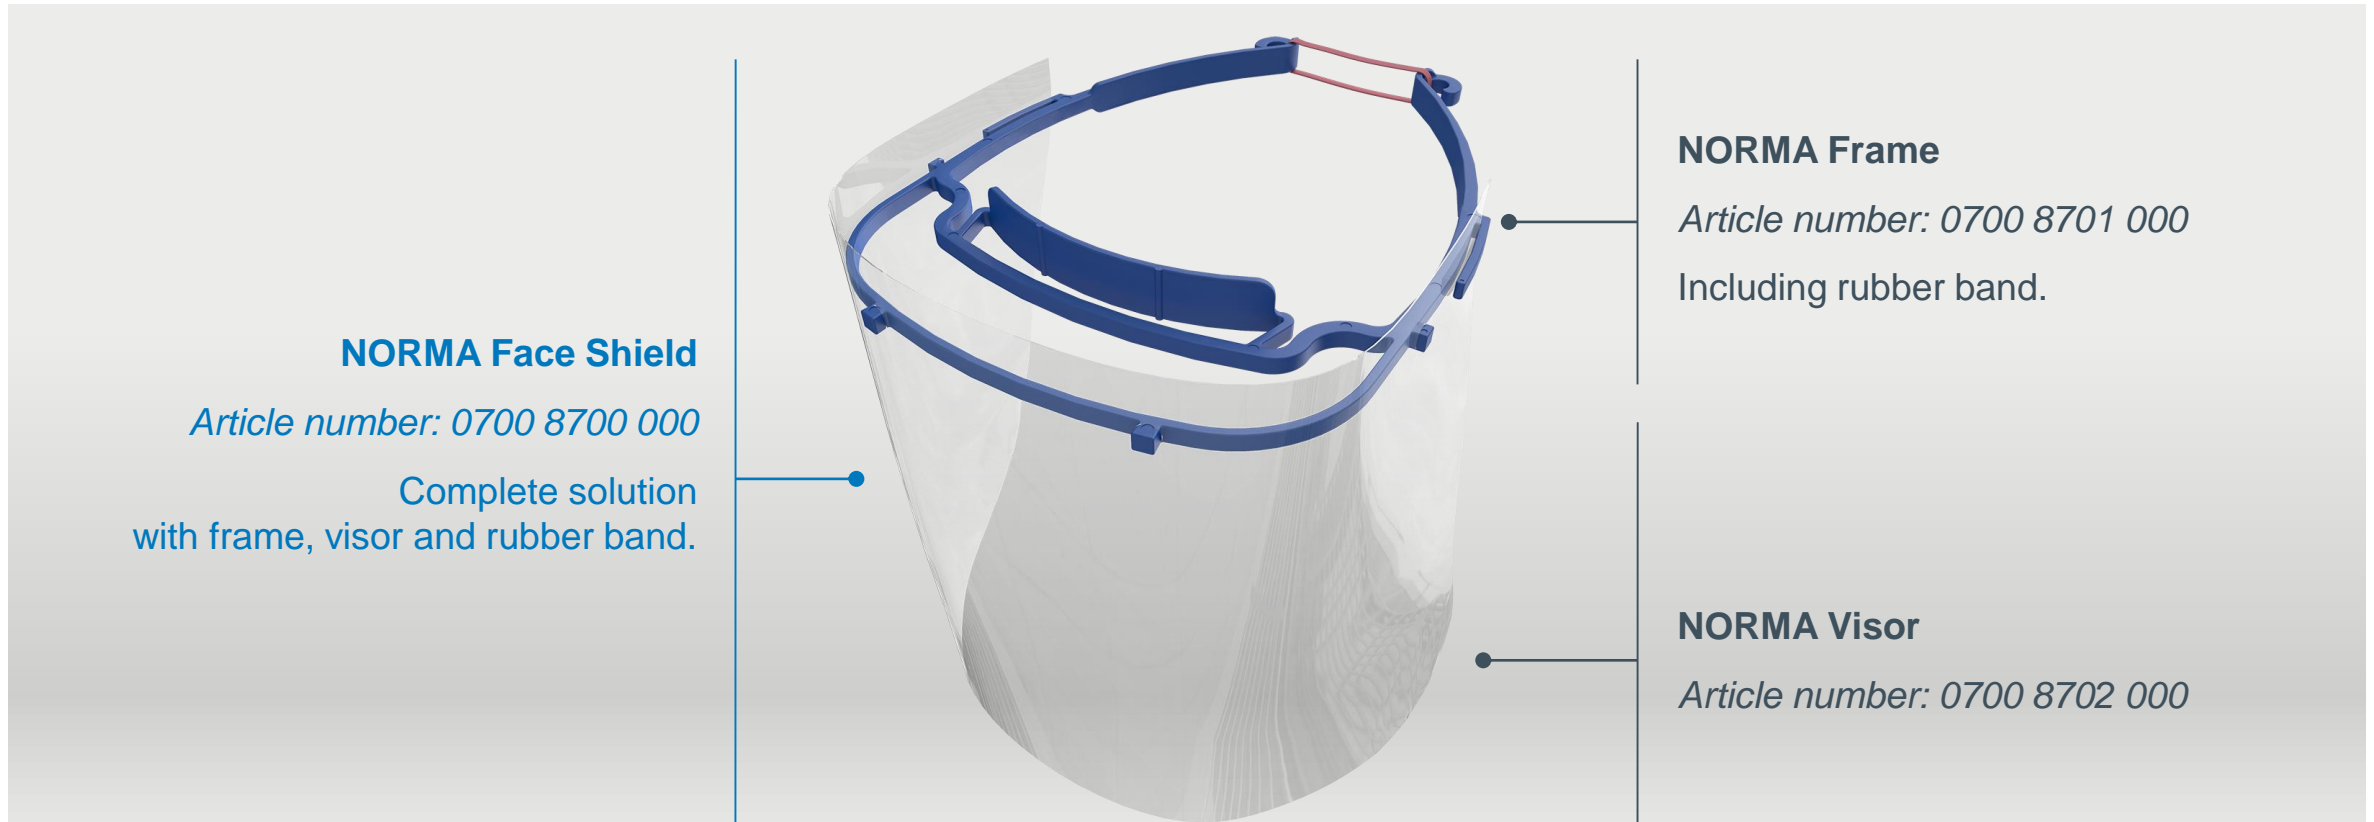

EFFICIENT SOLUTION

- + Frame is made of medical polymer
(certified according to VDI standard for medical devices,
so-called "Medical Grade Plastics")
- + Frame can be reused if it is sterilized
professionally
- + Replacing the foils is quick and easy
(foils are for single use only)
- + Also usable with conventional A4 foils
(instructions for perforation available from us)
- + Polycarbonate film offers best optical
properties and very good resistance to
chemical substances

ORDER INFORMATION

for NORMA Face Shield

Note: NORMA Face Shield is derived from **Face Shield Frame v2r6** by **Duokino/Muhammad Rahmat Md Padzil**, which is licensed and can be used in accordance with **CC BY 4.0** as well of **Protective Visor** by **Erik Cederberg/3DVerkstan**, used and licensed under **CC BY-SA 3.0**. The NORMA face shield is not a medical device. The face shield is not certified as a medical device and not as personal protective equipment. The user is responsible for its specialist use, cleaning and disinfection. The face shield is not a substitute for wearing a suitable face mask and does not guarantee safety against infections of any kind. The recommended precautions, such as hand disinfection and wearing gloves and a suitable face mask, must also be observed.

NORMA FACE SHIELD

The cooperation between the University Hospital Frankfurt, the FWS and the NORMA Group

Three strong partners - one strong solution

- + Due to the Corona pandemic, the NORMA Group contacted the University Hospital Frankfurt to offer that face shields could be produced using injection molding if required.
- + This resulted in a close cooperation with a project team of the University Hospital, which was already involved in the production of face shields.
- + The development from the first prototype to the finished product took place in a record time of only four weeks, to which our partner, Formen- und Werkzeugbau GmbH from Schönebeck, contributed significantly.
- + Doctors and nurses at the University Hospital Frankfurt tested different design variants and submitted suggestions for further optimization.
- + The combination of the medical-technical know-how of the University Hospital Frankfurt, the development expertise of the NORMA Group and the experience of the toolmaking professional FWS were instrumental to the success of the project.

Our products are used in a wide range of medical applications

NORMAPLAST hose connectors are used by leading manufacturers of **ventilators and dialysis devices** for the safe and reliable connection of hoses.

NORMAPLAST hose connectors & screw-in nozzles are used in **sterilization equipment**.

Hose clamps from the NORMA Group are used in **mobile hand washing stations**, among others.

Our subsidiary **CONNECTORS** specializes in **sterile connection technology** for the pharmaceutical and biotech industries.
