Stainless Steel Two Ear Clip

The use of two ear clips is an economical solution for many simple hose assemblies, used with air or other fluids.

The two ears give the clip extra grip and help to maintain constant pressure around the hose. Fitting is more flexible and exact.

The practical design of two ear clips means that they clamp firmly on to the assembly and cannot be removed once mounted. The edges are rounded to avoid damage to the hose. Due to the AISI-304 steel used in the manufacture of these clips, their corrosion resistance is outstanding. They are recommended especially in outdoor applications.

* Please see pages 84 and 85 for further information regarding application tools.

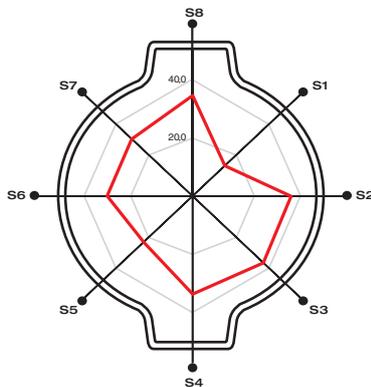

* Special diameters available on request.

Two Ear Clips

We stamp all Mikalor ear clips with the clamping range and our logo.

The edges are bevelled to make sure that there is no damage to the hose.

The materials used to manufacture Mikalor ear clips are free from dangerous substances and comply with current environmental legislation.

We manufacture a wide range of different diameters and models of ear clips. This means that they can be used in a multitude of different applications.

Fast and easy to assemble.
