INFORMATION**

ABA ROBUST ACID RESISTANT

- ① **The bolt is manufactured with integrated spacer** – one piece less to take care of
- ② **Band bridge with rolled up edges** – to protect the hose when the tightening force becomes high
- ③ **Hexagonal bolt** – ordinary tools such as a universal spanner can be used for tightening

A strongly dimensioned hose clamp

A big, strong clamp producing a secure and careful grip around powerful hoses. The Robust Acid resistant clamp is used where great tightening forces are needed – for instance large and reinforced hoses within agriculture, irrigation, drainage systems, sludge suction etc. where there is a high demand for durability and a safe functionality in spite of tough handling and severe conditions.

The curve radius of the band bridge, the even transitions between the parts and the band as well as the smooth band underside give a good contact surface against the hose and consequently good sealing.

Advantages at a glance

- Gentle on the hose when the tightening force becomes high
- Withstands hard tightening, repeated mounting and dismounting
- Safe functionality in severe conditions

Materials

Typical applications

- For large/reinforced hoses
- Agriculture
- Irrigation
- Drainage systems
- Sludge suction
