

Blast Light ABL

- 800 lumens, concentrated light cone
- Modern LED technology
- Light housing is specially designed for blast hose mounting
- Simple and fast exchange of the disposable glass
- Mounted ABL light will not interfere with the normal operation of DMH handle

The ABL blast light is designed for illuminating a working area during sandblast cleaning operations. The lamp runs on 12 volts and provides a bright concentrated light which can be directed at the working area. It utilizes an approximately 800-lumen bright LED module to produce a concentrated light cone. The ABL blast light attaches to the sandblast hose and does not interfere with operation of the DMH handle. The operator does not have to hold the light in one hand in order for it to work effectively.

The modern LED light runs on a 230V AC/12V DC transformer, supplied along with the package. The lamp has a hermetically sealed design and is protected against dust and abrasive material. A stable and replaceable deflector glass protects the lamp against abrasive material damage. The disposable glass can be easily replaced once the rubber cover is removed. The LED light is supplied with a 20m power cord.

Standard delivery

Assembled 12V LED light, AC/DC transformer, 20m. extension power cord.

Order code	Model	Description
29004100	ABL	LED Blast light, approx. 800 lumens, included Lamp assembly with waterproof connector, AC/DC transformer, 20m. extension power cord with waterproof connectors
29004000		Lamp assembly with waterproof connector, spare part for 29004100 only
29004013		AC/DC transformer, Input 230V~ AC, Output 12V= DC
29004014		Extension power cord, 20m, with waterproof connectors
