

This is the evolution of skincare.

MGC Derma Benelux

The MGC Derma Story

THE ORIGIN

MGC Derma was founded by MGC Pharma (MGC = medical grade cannabis) focused on research and development directed at processing and extraction methods to deliver the highest quality ingredients to their patients. Their intensive research lead to the discovery of Aquiol™.

They say oil and
water don't mix.
Here's how (and why) we did it.

A Q U I O L TM

Your body is over 50% water. For years skincare has focused on applying oil to the skin to retain moisture, but water absorbs more quickly and deeply through your pores. We have taken the best of both ideas and created a new platform for delivering the best and most protective ingredients in skincare. Hempextract has been used for generations as a skin treatment, but it existed only as an oil. Now, there is AquiolTM, a proprietary compound that is a real CBD material boasting greater than 98% purity, that absorbs in water-based creams for superior delivery.

So, for the first time, oil and water do mix, and the result is better skincare with CBD.

How CBD makes today's best skincare ingredients even better.

CBD COMBINED INGREDIENTS THE ENHANCEMENT EFFECT

Our products work with the body's natural purification system, which encourages repair and rejuvenation of the skin itself. Our commitment to using the most pure and effective cosmetic ingredients available is enhanced by the inclusion of our proprietary extract, boosting the properties of these ingredients.

Love your skin with CBD.

T H E B E N E F I T

More and more people are discovering CBD as a vital ingredient to rejuvenate and nourish their skin. Its molecular structure includes a high concentration of vitamins A, B, D and E as well as a host of anti-oxidants, which means it can naturally prevent, reduce and repair cell damage-leaving your skin refreshed, elastic and glowing.

Every MGC Derma product
delivers the highest quality
patented CBD formulation
for...

skincare beyond compare.

This is MGC today.

Refined Production.

Swiss precision.

It makes a difference.

Our products are produced in small batches in Switzerland to the highest manufacturing standards. Utilizing state-of-the-art extraction processes, to maintain the ingredients' exceptional quality, allows us to create industry-leading natural formulations.

Jointly, we are dedicated to using fair trade ingredients wherever possible and are honest and transparent, using ethically sourced natural ingredients with clinically proven results, that are vegan with no animal origin.

Finest Ingredients.

As natural as you are. The way it should be.

We started with the very best natural ingredients to create the best products in skincare. Just adding CBD was not enough. All of our ingredients are carefully processed and effectively support the regeneration of skin. Importantly, it's not just what you put into the products, it's what you don't.

Our products are...

Free from parabens

Free from sulphates

Free from animal products

Free from paraffins

Free from petrochemicals

Free from silicones

Free from aluminium salts

Free from dyes

Our Product Ranges.

AGELESS

Specially formulated with natural active ingredients to tackle wrinkles head-on, this range gives skin a helping hand before the signs of ageing become clearly visible. Enhanced by high-purity Cannabidiol (CBD), this range will help make skin appear firmer and younger with reduced wrinkles and a natural healthy glow.

EVERYDAY

Uniquely formulated with high-purity Cannabidiol (CBD) and natural active ingredients, this range of moisturizing masks, scrubs, and creams will leave skin feeling soft, smooth and hydrated.

REVIVE

Dermatological products which undergo strict, volunteer based clinical tests, the Revive range features the very best of what CBD can do. Anti-inflammatory, phytocannabinoid-based skin treatments deliver proven success and impact on users' skin conditions and well-being, with measurable improvement after 30 days.
