

ItalWax®  
**FULL BODY WAX**  
LUXURY EDITION

WAXING PROCEDURE GUIDE

1 Pour the required amount of Full Body Wax into the container for wax heating.

2 Place the container in the wax heater and set the temperature to t. 40° C (104 F°).

3 For full body waxing use a big spatula.

4 Stir the wax from time to time and watch its consistency, the ready-for-use wax should resemble liquid honey.

5 Put on gloves.

6 To cleanse the skin before the procedure, use a prewax foaming lotion.

7 Apply the required amount of foaming lotion and evenly distribute it over the entire treated surface.

8 Remove the remaining lotion with a tissue.

9 To prepare the skin for the waxing procedure, use the pre wax Italwax Full Body Oil.

10 Apply small amount of oil to the treated area.

11 Distribute oil with light massage movements.

12 Remove excess oil with a tissue.

13

Dip out the the required amount of wax with a spatula. Apply wax to the treated area regardless hair growth direction.

14

Using the spatula edge, quickly spread the wax over the depilation area, immediately covering the large surface.

15

Form a small "lobe" at application end, which you can then grab onto. Wait a few seconds for the wax to set up.

16

Pretension and fix the skin in the direction opposite the tear-off. Remove the wax with sharp movements away from yourself and parallel to the skin.

If necessary, repeat the procedure in the next section.

17

Use Italwax Full Body Oil to finish the procedure.

18

Apply the required amount of oil and spread it over the skin with light, massage movements.

Italwax

19
