COSMOS  
ORGANIC

Today La Corvette is expanding its horizons by releasing “MÉDITERRANÉE”, a range of organic cosmetics that proudly flies the colours of its birthplace in a bouquet of generous, refined scents, an explosion of light, a call to the deep sea and a soft dream of purity.

### CORVETTE MÉDITERRANÉE

All soap bars, liquid soaps and hand creams are made from raw materials derived from nature and enriched with organic ingredients that are kind to skin and nature.

### A NATURAL, GENEROUS, ATTRACTIVE RANGE

A voluntarily avant-garde collection that still has continuity of spirit and aesthetics with the La Corvette range. The brand block features feminine shapes and foil stamping. The illustrations depict a fragrance, an ambiance, a feeling. They come together in a way that is precious, luminous and modern all at once.

### MEDITERRANÉE

shakes up the traditional interpretation of the scents of Provence: our 5 fragrances are olfactory creations composed in Grasse, the world capital of perfume. They are inspired by the natural materials historically present in Provence, in honour of the essences of the South of France.
