

ANIWOOD

ANIMAL WOOD PUZZLE

ANIWOOD Wooden Puzzles are made of 5 mm thick natural plywood, which makes them more attractive, and pieces more resistant and easy to manipulate.

High-precision laser cutting of **ANIWOOD** parts offers a precise, slack-free fit. Printing with UV inks results in vivid and long-lasting colors.

ANIWOOD Puzzles are presented in wooden boxes of different sizes for each type of puzzle:

L (large; box measures 30.9 x 43.8 x 3 cm)

M (medium; box size 22.2 x 31.5 x 3 cm)

S (small; box measures 16 x 22.8 x 3 cm)

Clear visibility of its value in relation to the size of the puzzle.

The **ANIWOOD** Puzzles are the only ones that can be mounted inside the die of the box lid, which facilitates its assembly and makes it suitable for ages 8 and up. They can also be mounted on the exclusive **ANIWOOD REAL SIZE guide sheet**, or without it for the more experienced.

Since the **ANIWOOD** Puzzles can be mounted on the die of the lid, they are very easily transportable from one place to another in the house, both during the construction process and once they are finished.

The **ANIWOOD** Puzzles are the only ones together with Unidragon that include a die-cut adhesive sheet in case you want to keep the puzzle assembled.

The **ANIWOOD** Puzzles are presented in a wooden box. They include a cloth bag as an option to store loose pieces and two feet to turn the lid into a stylish piece of decoration.

ANIWOOD Puzzles are easily recognizable and have a personal stamp:

- Because its original BLACKBOX

- His Because its own brandname **ANIWOOD**

The **ANIWOOD** service has spare parts to supply in case of loss or breakage.

OTHER

Other puzzles are made with plywood of less thickness or MDF, which makes them less attractive (more difficult to distinguish from a cardboard puzzle), less resistant and more difficult to manipulate pieces.

Others are cut with less precision lasers that produce loose and inaccurate fittings. Printing with conventional inks results in less vivid and less durable colors.

The rest of the puzzles are presented in boxes not always made of wood (many of them made of cardboard) of the same size regardless of the size of the puzzle:

Average box size: 16 x 20 x 4.2 cm

No visibility of the value of the larger puzzle.

All other puzzles cannot be mounted on the die on the box lid.

In some cases they have a guide sheet (not real size), in other cases not.

The rest of the wooden puzzles do not include die-cut adhesive foil to preserve the assembled puzzle.
