MOONRIVER AUDIO
MODEL 404
STEREO INTEGRATED AMPLIFIER

DISCOVER
THE IMPOSSIBLE

Moonriver Model 404

is the outcome of a 3-year research, the aim being to achieve incredible performance regardless of price range. The 404 amplifier will extract hidden elements and render textures from within any audio format, with the source, speakers and room to set the limits. Its culture will suit all music, as the Model 404 is by design set to define the faintest nuances of which tone integrity is composed.

Design & Ergonomics

The heart of Model 404 is pure and minimal but the interface is user oriented and easy to operate by anyone in seconds with no need to resort to the user manual. Four knobs and three switches give direct access to any function. Full remote control capability is also included.

Modular Architecture

Moonriver 404 Reference amplifier is modular by nature; it can accommodate an MM or MM/MC phono stage and a SPDIF or a USB asynchronous DAC with support of DSD and MQA formats. Fitting these modules is simple and can take place at any time, on or after purchase. The USB DAC may also be upgraded with a newer version to meet future needs.

Revealing the transparency

We are not to say whether Model 404 is virtually transparent or inherently forgiving. Voicing it to appreciate the playlist and respect the user at all times has been the sum of all of our efforts.

Specifications

Inputs: 5 (line 1 and 4 optionally occupied by phono stage and USB DAC respectively, 1 x tape loop)
Outputs: 2 x preamp out, 1 x rec out
Max. power output: 50 W per channel into 8 Ω
Frequency response: 10 Hz to 50 kHz
Total harmonic distortion: 0.05%
Signal to noise ratio: 95 dB (line)
Dimensions (mm): 430 (W) x 390 (D) x 135 (H)
Weight: 12 kg (without phono or USB DAC)
