Trigger Operation Diagram

Instructions

Step one:

- Disconnect the power on your Elite electric screen.
 - Ref. to Fig.1, connect ZU12V to the Projector Power Connector
 - Ref. to Fig.1, use the projector power cord to connect ZU12V to the power outlet. (red trigger light turn on)
 - Press & Hold **[Button 1]** with a sharp object. (red light will blink)
- AND quickly plug in the Elite electric screen into the power outlet (you may need another person to plug in the screen power cord), release [Button 1] after 3 seconds**

Step two:

- Disconnect the power on your Elite electric screen.
 - Connect the power cord of ZU12V to the projector, turn on the projector, then Press & Hold **[Button 2]** with a sharp object. (blue light will blink) , release **[Button 2]** after 3 seconds.
 - Turn off the projector.
- ★ Connect the power on your Elite electric screen .Turn on the projector power, and the screen will drop automatically.
If you turn off the projector power, it will require all power off (**ex. fan off**), the screen will retract automatically.
- ★ If the motorized screen does not automatically drop or retract, repeat process from step one.
